

Product Specification: Dynamic Endorsement Tag System

1. Overview

This document outlines the specifications for Mapping With Melanin's new Dynamic Endorsement Tag System. This system replaces the current static "What stands out?" tags with an adaptive, context-aware system that dynamically generates tags based on a business's type and cultural community. The goal is to provide culturally relevant and business-appropriate tags that enhance user reviews and accurately reflect the diverse experiences offered on the platform.

Context and Problem Statement

Currently, the app utilizes 14 static endorsement tags (e.g., Above & Beyond, Hidden Gem, Community Favorite, Worth Every Visit) that appear identically for every business, regardless of its nature. This one-size-fits-all approach is problematic. For example, a dentist should not receive the same tags as a soul food restaurant, and professional services require tags emphasizing trust and cultural competence rather than "Worth Every Visit." Furthermore, culturally specific businesses should have access to culturally resonant tags (e.g., "Abuela Approved" for a Hispanic bakery) alongside universal ones.

2. Tag Categories and Definitions

The new system categorizes tags into several distinct groups based on business type and cultural context.

2.1 Universal Tags

These tags are applicable and available for **ALL** business types on the platform.

Current Tag	Action	New/Updated Tag	Notes
Hidden Gem	Keep	Hidden Gem	
Community Favorite	Keep	Community Favorite	
Safe Space	Keep	Safe Space	
Truly Welcoming	Keep	Truly Welcoming	
I'll Be Back	Keep	I'll Be Back	

Black Excellence	Replace	Community Excellence	Culturally adaptive (see Section 4)
Five-Star Experience	Remove	N/A	Too generic; sounds like Yelp

2.2 Experience Business Tags

Applicable to restaurants, bars, entertainment venues, and cultural sites.

Sub-Category	Tags
Food & Restaurant	Worth the Wait, Made from Scratch, Portions are Generous / "They Don't Play About Portions", Seasoned Right / "The Seasoning is There", Cookout Certified, Comfort Food Done Right, "Sazón Certified" (Hispanic), "Jollof Certified" (West African), "Real Ting" (Caribbean)
Food & Restaurant (Adaptive)	Grandma Approved (Black American), Abuela Approved (Hispanic), Habesha Approved (Ethiopian), Yard Approved (Caribbean/Jamaican), Naija Approved (Nigerian), Bà Nội's Pick (Vietnamese), Halmeoni Approved (Korean), Aprovado pela Vovó (Brazilian)
Bar/Lounge/Nightlife	Vibes on Point, DJ Knows What They're Doing, Strong Pours, Good Energy, Safe for Women, "The Playlist Hit Different"
Entertainment/Events	Worth the Ticket Price, Unforgettable Experience, Bring Your Whole Crew, Culture Lives Here

2.3 Beauty & Barber Tags

Applicable to salons, barbershops, nail shops, and spas.

Sub-Category	Tags
General	Sharpest Lineup in Town, Left Looking Right, Knows My Texture, No Rush, "They Understand 4C", Fresh to Death,

Transformation Artist, "My Go-To" / "Been Going for Years", Gentle Hands

2.4 Professional Service Tags

Applicable to doctors, dentists, lawyers, accountants, and therapists. The tags "Above & Beyond" and "Exceptional Service" from the legacy system have been moved here.

Sub-Category	Tags
Medical	This Doctor Listens, Bedside Manner on Point, Took Time to Explain Everything, Made Me Feel Heard, Didn't Rush Me, Culturally Competent, "I Finally Found MY Doctor", No Judgment, Gentle, "Understands Our Bodies"
Legal	Fought for Me, Explained Everything in Plain English, Responsive and Available, "They Actually Care", Trustworthy with My Business
Financial/Accounting	Made It Make Sense, Helped Me Build Wealth, Patient with My Questions, "Finally Understand My Taxes"
Therapy/Mental Health	Safe to Be Vulnerable, Gets My Cultural Context, No Judgment Zone, "Changed My Life", Understands Generational Trauma

2.5 Retail Tags

Applicable to shops, boutiques, and online stores.

Sub-Category	Tags
General	Unique Finds, Quality Over Quantity, Fairly Priced, "I Always Find Something", Supports Local Artists, "My Secret Spot", Culturally Curated

2.6 Professional Contributor Badges

These badges are for individuals sharing knowledge or content on the platform.

Sub-Category	Tags
Health/Medical	Community Educator, Trusted Voice in Health, "Breaks It Down Simply", Evidence-Based
Legal/Financial	Community Advocate, "Keeps Us Informed", Plain Language Expert
Cultural Ambassadors/Travel	Globe Trotter, Culture Keeper, "Been There, Done That", Hidden Gem Finder, "Trust Their Recommendations", Storyteller
General Content	Consistent Creator, Community Voice, "Always Helpful", Rising Star

3. Technical Implementation

When a user initiates a review by tapping "What stands out?", the system must dynamically construct the available tag options based on the business's profile data.

3.1 Tag Resolution Logic

The system should execute the following steps:

1. **Check businessType** : Determine the broad category (e.g., experience, service, retail, community).
2. **Check category** : Determine the specific sub-category (e.g., restaurant, dentist, salon).
3. **Check culturalCommunity** : Identify the cultural ownership or affiliation (e.g., Black-owned, Hispanic-owned, Ethiopian-owned).
4. **Aggregate Tags**: Present a combined list of **UNIVERSAL tags + TYPE-SPECIFIC tags + CULTURAL tags** (if applicable).
5. **Display Counts**: Show the aggregate counts on the business card (e.g., "47 people said 'Worth the Wait'").

3.2 UI/UX Considerations

The tags should be presented as tappable pills, consistent with the current design language. The options displayed must dynamically update based on the business being reviewed.

4. Display on Business Card

On the business profile card (specifically Layer 2 — Community Voice), the system must prominently display the **TOP 3 endorsement tags** sorted by count.

Example for an Experience Business:

- "101 said Worth the Wait"
- "87 said Grandma Approved"
- "64 said Made from Scratch"

Example for a Professional Service:

- "89 said This Doctor Listens"
- "76 said Bedside Manner on Point"
- "52 said Made Me Feel Heard"

5. Cultural Adaptivity Rules

The system must intelligently adapt specific tag families based on the **business's** cultural community, regardless of the reviewer's background. The underlying meaning remains constant, but the language is culturally specific.

5.1 The "Home Cooking" Tag Family

This family represents the sentiment: "This tastes like home. Like someone's grandmother made it with love."

Business Cultural Community	Displayed Tag
Black-owned	Grandma Approved
Hispanic-owned	Abuela Approved
Ethiopian-owned	Habesha Approved
Vietnamese-owned	Bà Nội's Pick
Korean-owned	Halmeoni Approved
Caribbean-owned	Yard Approved
Nigerian-owned	Naija Approved
Brazilian-owned	Aprovado pela Vovó

5.2 The "Excellence" Tag Family

The legacy "Black Excellence" tag is replaced with a culturally adaptive equivalent.

Business Cultural Community	Displayed Tag
Default/General	Community Excellence
Ethiopian-owned	Habesha Excellence
Hispanic/Latino-owned	Orgullo Latino

6. Verification Notes for Replit

- **Database Schema:** Ensure the `Business` model (or equivalent) includes `businessType` , `category` , and `culturalCommunity` fields.
- **Tag Data Structure:** Tags should likely be stored with metadata indicating their applicability (e.g., `applicableTypes: ['restaurant', 'bar']` , `culturalMapping: { 'Hispanic': 'Abuela Approved' }`).
- **Review Submission API:** The API endpoint handling review submissions must correctly associate the selected tags with the business and increment the respective counters.
- **Business Profile API:** The endpoint fetching business details must aggregate and return the top 3 tags by count for display on the business card.
- **Frontend Rendering:** The review form component must fetch or compute the available tags based on the current business context before rendering the tappable pills.
