

Replit Codebase Audit — August 5, 2026

Current Production: commit 504ce15b (animated preview page)

WHAT REPLIT HAS ACTUALLY BUILT (verified in code)

Server Routes (200+ endpoints exist)

CORE FEATURES (FUNCTIONAL):

- Auth: login-email, Apple Sign-In, register, forgot-password, reset-password, logout
- Businesses: full CRUD, search, categories, broadcasts, identity, improvement suggestions
- Cultural Sites: full CRUD, reseed, stories
- Events: CRUD with RSVP
- Reviews: create, photos, thumbs-up
- Community Posts: full CRUD
- Map: directions, safety-context, embed-url, nav-voice
- Waitlist: join, count, invite, leaderboard, my-entry, recommend-business, social-refer
- Notifications: register, preferences, mark-read
- Admin: users, businesses, metrics, invites, seed endpoints

KINFOLK AI (PARTIALLY BUILT — 74 references in kinfolk.ts):

- /kinfolk/chat — conversational AI
- /kinfolk/speak — voice interaction
- /kinfolk/transcribe — speech-to-text
- /kinfolk/business-action-plan — business intelligence
- /kinfolk/community-trends — trend analysis
- /kinfolk/expansion-analysis — growth analysis
- /kinfolk/feedback — user feedback
- /kinfolk/health — system health
- /kinfolk/lists — curated lists

- /kinfolk/log-search — search logging
- /kinfolk/memory-summary — user memory
- /kinfolk/preferences — user preferences
- /kinfolk/proactive — proactive recommendations
- /kinfolk/relocation — relocation assistance
- /kinfolk/sessions — conversation sessions
- /kinfolk/tasks — task management
- /kinfolk/tasks/bulk — bulk tasks
- /kinfolk/twin-recommendations — personalized recs
- /kinfolk/voice-usage — voice analytics
- /kinfolk/aave-level — cultural language level
- /kinfolk/skip-feedback — skip feedback

SAFETY FEATURES (PARTIALLY BUILT):

- /safety/checkins — check-in system
- /safety/heatmap — safety heatmap
- /safety/location-shares — location sharing
- /safety/officer-watch — police monitoring
- /safety/officer-watch/pending — pending reports
- /safety-tips — safety tips
- /safety-tips/nearby — location-based tips
- /safety-context — route safety context
- /safety-context/supported — supported areas
- /reports — incident reports
- /reports/proximity-warnings — nearby warnings
- /incidents — incident tracking

PARTNERSHIP TRACKING (BUILT):

- /external-clicks — tracks clicks to business/institution websites
 - Captures: institutionName, institutionType, institutionUrl, referenceType, referenceId, source, isSafetyRelated, city, state, userId
 - Comment in code: "Users clicking through to a business/employer website → tracked here"

- /external-clicks/analytics — analytics dashboard for click data

REFERRAL SYSTEM (BUILT):

- /referrals/my-code — get user's referral code
- /referrals/track — track referral conversions
- /waitlist/leaderboard — city leaderboard
- /waitlist/social-refer — social sharing referral
- /waitlist/recommend-business — recommend a business

WAITLIST (BUILT — accepts these fields):

- email, firstName, lastName, city, state
- isBusinessOwner, websiteUrl
- referralCode, referredBy
- familyEmails (up to 6)
- cityNomination
- previewChoice (safety, discovery, business, community) — NOTE: "ambassador" NOT yet added
- UTM tracking (utmSource, utmMedium, utmCampaign)

TRAVEL & JOURNEYS:

- /travel-planner/generate — AI trip planning
- /travel/flights — flight search
- /travel/flights/status — flight status
- /travel/recommendations — travel recs
- /journeys — life journeys
- /journeys/types/list — journey types

FINANCIAL:

- /financial/goals — financial goals
- /financial/resources — financial resources

WELLNESS:

- /wellness/checkin, /wellness/goals, /wellness/meetings, /wellness/streak
- /wellness/crisis-resources

MARKETPLACE:

- /marketplace — listings
- /marketplace/categories
- /marketplace/my/listings
- /marketplace/saved
- /marketplace-fees/config, /marketplace-fees/my

KNOWLEDGE HUB:

- /knowledge/articles, /knowledge/bookmarks, /knowledge/categories
- /knowledge/delivery-preferences, /knowledge/digest
- /knowledge/experts, /knowledge/feed, /knowledge/happening-now
- /knowledge/hubs/resolve, /knowledge/issues, /knowledge/topics

OTHER FEATURES:

- Mentorship: /mentorship, /mentorship/me, /mentorship/specialties
- Jobs: /jobs, /jobs/my-posts, /jobs/saved
- Groups: /groups, /groups/my-invites
- Guides: /guides (create, list, detail)
- Spaces: /spaces, /space-reports
- Stories: /stories
- Vibes: /vibes/list, /vibes/search, /vibes/tag, /vibes/my-tags
- Smart Pathways: /smart-pathways/compare, /smart-pathways/meta, /smart-pathways/pins
- Points/Rewards: /points, /rewards, /redemptions
- Saved Places: /saved-places, /saved-locations
- Lists: /lists
- Wishlist: /wishlist
- Show Love: /show-love, /show-love/spotlight
- Hashtags: /hashtags/trending, /hashtags/search, /hashtags/following
- Alerts: /alerts
- Signals: /signals
- Surveys: /surveys
- DocuSign: /docusign/* (consent, seller agreement, webhook)

- Stripe/Billing: */stripe/*, */billing/*
- RevenueCat: */revenuecat/sync*, */revenuecat/webhook*

Mobile Screens (100+ screens exist)

Key screens: discover, map, community, profile, events, businesses, cultural-heritage, safety-hub, kinfolk-memory, kinfolk-settings, kinfolk-tasks, life-journey, travel-planner, financial-hub, health-hub, marketplace, mentorship, jobs, groups, guides, spaces, vibe-search, smart-search, creator-profile, creator-public, dashboard, referral, waitlist, preview, onboarding (5 screens)

Onboarding Flow (5 screens):

1. */onboarding/index* — Welcome/intro
2. */onboarding/safety* — Safety preferences
3. */onboarding/travel* — Travel interests
4. */onboarding/identity* — "Who Do You Want to Support?" (ownership designations + diaspora countries)
5. */onboarding/agreement* — Terms
6. */onboarding/join* — Final join

Identity screen collects:

- Ownership designations (which communities to support)
- Diaspora countries (via `DiasporaFlagPicker`)
- Stored in `AsyncStorage` as `PENDING_OWNERSHIP_PREFS_KEY`

WHAT'S MISSING / NOT CONNECTED

1. **previewChoice "ambassador"** — waitlist only accepts: safety, discovery, business, community (not ambassador yet)
2. **Onboarding data → Kinfolk AI** — Identity preferences stored in `AsyncStorage` but unclear if they feed into Kinfolk's recommendation engine on the server
3. **Allied Business distinction** — No clear tier system (minority-owned vs. community-verified non-minority)
4. **Business accountability/discrimination scoring** — Safety reports exist but no automated deprioritization logic
5. **Diaspora international business additions** — No specific flow for adding businesses in other countries

6. **Life-stage intelligence triggers** — Journeys exist but unclear if they proactively prompt based on behavior patterns
7. **Creator content matching** — Creator profiles exist but no demand-signal matching to creators
8. **Font scaling** — ZERO protection (allowFontScaling not set anywhere)
