

Mapping With Melanin™ — Critical Map, Pin & Living Pages Fix

PASTE-READY REPLIT INSTRUCTIONS

Priority: P0 — These issues break the core user experience

Date: August 8, 2026

Context: Founder tested production and found multiple critical failures

ISSUE 1: ALL BUSINESSES PINNED TO SAME LOCATION

What's Happening:

All 10 businesses in the sidebar show "35.2 km away" — the exact same distance. On the map, business pins are clustered at what appears to be a generic Philadelphia center point rather than their actual addresses.

The Problem:

Replit either:

- Did not geocode the actual addresses provided in the Business Intake sheet
- Assigned a default lat/lng (e.g., Philadelphia city center) to all businesses
- Failed to use the real addresses when creating the pins

Evidence:

- The Nail Jawns has address: 429 N. 64th St, Philadelphia, PA 19151
- ISSAAESTHETICS has address: 11409 Amherst Ave Unit A, Silver Spring, MD 20902
- These are in DIFFERENT STATES yet appear at the same distance

FIX REQUIRED:

1. **Geocode every business using its actual address.** Use the addresses from the Business Intake sheet:

Business	Address	City	State	Zip
The Nail Jawns	429 N. 64th St	Philadelphia	PA	19151

Cherished Beauty Supply	526 Main St	Darby	PA	19023
Angie's Eats	(needs address)	Philadelphia	PA	—
ISSAAESTHETICS	11409 Amherst Ave Unit A	Silver Spring	MD	20902
Candy Clouds By Cass	(needs address)	Santa Clara	CA	—
Little Essentials	(needs address)	New York	NY	—

1. **For businesses without a precise address:** Use the city center as a temporary coordinate BUT display "Approximate location — city level" on the pin. Do NOT pretend all businesses are at the same spot.
2. **For ALL seeded cultural sites, HBCUs, heritage festivals, and sundown towns:** Verify that each has REAL coordinates. If they were bulk-seeded with placeholder coordinates, re-geocode them using their actual addresses or known locations.
3. **Verification test:** After fix, no two businesses at different addresses should share the same lat/lng coordinates. Run: `SELECT name, latitude, longitude, COUNT(*) FROM businesses GROUP BY latitude, longitude HAVING COUNT(*) > 1` — this should return ZERO rows (unless businesses genuinely share an address like a mall).

ISSUE 2: HBCU PINS MISSING + NOT CLICKABLE

What's Happening:

- The HBCU sidebar shows "74 sites" but we confirmed 100 HBCUs were seeded (with full historical descriptions). 26 are missing.
- When clicking an HBCU in the sidebar list, the map does NOT fly/animate to that HBCU's location. The map stays wherever the user currently is.

FIX REQUIRED:

1. **Find the missing 26 HBCUs.** Run a count: `SELECT COUNT(*) FROM cultural_sites WHERE site_type = 'hbcu'` — should be 100+. If less, identify which ones are missing and re-seed them.
2. **Make sidebar items CLICKABLE with map fly-to.** When a user clicks ANY item in the sidebar list (HBCU, cultural site, business, festival, etc.), the map MUST:

- Animate/fly to that location's coordinates
- Center the pin on screen
- Open the pin's info popup/card
- Zoom to an appropriate level (street level for businesses, city level for HBCUs if coordinates are approximate)

3. This applies to ALL sidebar lists, not just HBCUs:

- Businesses list → click → map flies to business location
- Cultural Sites list → click → map flies to site
- HBCUs list → click → map flies to HBCU
- Festivals list → click → map flies to festival location
- Markets list → click → map flies to market
- Public Art list → click → map flies to art location

4. Implementation: Use the map library's `flyTo()` or `animateToRegion()` method:

JavaScript

```
// Web (Mapbox/Leaflet)
map.flyTo([lat, lng], zoomLevel, { duration: 1500 });

// React Native (react-native-maps)
mapRef.current.animateToRegion({
  latitude: lat,
  longitude: lng,
  latitudeDelta: 0.01,
  longitudeDelta: 0.01,
}, 1000);
```

ISSUE 3: LANGUAGE REGRESSION — "Verified Black-Owned"

What's Happening:

The Nail Jawsns business page displays "Verified Black-Owned" with the text: "This business is part of our verified network of minority-owned enterprises, supporting economic empowerment."

The Problem:

- The badge says "Verified Black-Owned" — the word "Verified" is problematic here because it implies we verified their RACE, which we don't do. We verify the BUSINESS is real.
- Displaying the specific ownership designation ("Black / African American-Owned") is CORRECT and DESIRED — this is what the owner self-identified as.
- The language audit was about removing GENERIC uses of "Black-owned" as a catch-all for all minorities. Specific, self-identified ownership designations are always kept.

FIX REQUIRED:

1. **Remove "Verified" prefix from the ownership badge.** The badge should display the ownership designation exactly as self-identified: "Black / African American-Owned" — NOT "Verified Black-Owned."
 2. **"Verified" should refer to the BUSINESS being real** (has a real address, real social media, confirmed to exist) — NOT to the owner's race/ethnicity being verified.
 3. **Correct badge display:**
 -  "Black / African American-Owned" (ownership designation as self-identified)
 -  A separate "Verified Business" badge (meaning the business itself is confirmed real)
 -  "Verified Black-Owned" (conflates business verification with race verification)
 4. **The supporting text** "This business is part of our verified network of minority-owned enterprises, supporting economic empowerment" is fine as a generic description — just fix the badge header.
-

ISSUE 4: WRONG VIBE TAGS DISPLAYED

What's Happening:

The Nail Jawns shows these "Community Vibes": Hidden Gem, Community Staple, Grandma Approved, Worth Every Visit, Date Night Worthy, Family Friendly, Black Excellence

The Problem:

1. **These are NOT the tags the founder specified.** The Business Intake sheet lists Quick Review Previews for The Nail Jawns as: "On Time, Every Time" / "Clean Station" / "Worth The Price"
2. **"Black Excellence" is not a vibe tag** in the approved Vibe Reference sheet. It doesn't exist in the master directory.

3. **"Date Night Worthy" is not appropriate for a nail salon.** The Vibe Reference shows nail salons fall under Beauty & Personal Care, which has vibes like: Soft Life, Auntie Energy, Tía Energy, Main Character Energy, Sunday Best, Chill & Restore, Come As You Are, For The Culture, Neighborhood Love, Luxury Without The Attitude.
4. **"Worth Every Visit" is not in the approved tag list** at all.
5. **Replit appears to have invented or used old/generic tags** instead of pulling from the MASTER Business Directory.

FIX REQUIRED:

1. **Pull vibe tags ONLY from the Vibe Reference sheet** in the master directory. The approved vibes for Beauty & Personal Care are:
 - Soft Life
 - Auntie Energy
 - Tía Energy
 - Main Character Energy
 - Sunday Best
 - Chill & Restore
 - Come As You Are
 - For The Culture
 - Neighborhood Love
 - Luxury Without The Attitude
2. **Pull Quick Review / endorsement tags ONLY from the Quick Reviews sheet.** For Beauty & Personal Care (Nail Salons), the approved tags include:
 - On Time, Every Time (universal)
 - Clean Station (universal)
 - Worth The Price (universal)
 - Blessed Hands (adaptive)
 - They Know Our Hair (adaptive)
 - Grandma Approved (adaptive)
 - Style Lasted (specific)
 - My Shade Was There (specific)
 - Didn't Overbook Me (specific)
 - Book Now (recommendation)

- Ask For Them By Name (recommendation)

3. **Remove tags that are incorrectly applied or not in the master directory:**

- ❌ "Worth Every Visit" — DELETE, does not exist in approved taxonomy
- ❌ "Community Staple" — DELETE, does not exist in approved taxonomy
- ❌ "Date Night Worthy" — DELETE for nail salons (only valid for Food & Drink, not Beauty & Personal Care)
- ⚠️ "Black Excellence" — This IS a valid culturally-specific endorsement tag (alongside "Asian Excellence," "Latino Excellence," etc.) BUT it should be an ENDORSEMENT tag that the community earns through taps, not a pre-assigned vibe. It should NOT appear on a business page unless 10+ community members have tapped it. Add it to the endorsement taxonomy as a culturally adaptive tag family (Black Excellence / Asian Excellence / Latino Excellence / Caribbean Excellence / etc.).
- ❌ "Hidden Gem" — This exists in the Vibe Reference for Shopping & Retail, NOT for Beauty & Personal Care. Wrong category assignment.

4. **For businesses where the founder specified Quick Review Previews in the Business Intake sheet, those MUST appear on the business page.** The Nail Jawsns should show: "On Time, Every Time" / "Clean Station" / "Worth The Price"

5. **IMPORT THE MASTER DIRECTORY AS SOURCE OF TRUTH.** The Replit Source of Truth sheet in the Excel file contains explicit instructions. Follow them exactly.

ISSUE 5: LIVING PAGES FOR ALL PINS (NEW REQUIREMENT)

What's Needed:

Every pin on the map — businesses, cultural sites, HBCUs, heritage festivals, markets, public art — should have a LIVING PAGE that can grow over time with community-contributed content.

The Concept:

A "Living Page" is not a static directory listing. It's a page that evolves as the community interacts with it. Think of it like a community-powered Wikipedia page for each location.

What a Living Page Includes:

Content Type	Who Can Add	Applies To
Photos	Founder (admin), community members, business owner	ALL pins
Videos	Founder (admin), community members, business owner, cultural ambassadors	ALL pins
Written stories/memories	Community members	ALL pins
Visit tips (best times, what to wear, etc.)	Founder (admin), community members	Cultural sites, HBCUs, heritage sites
Historical context/description	Founder (admin), Manus-seeded data	Cultural sites, HBCUs
Community endorsement tags	Community members (one-tap)	Businesses, Community Professionals
"The Real" trust tags	Community members (one-tap)	Professional businesses
Vibe tags	Community members (one-tap)	Experience businesses
External links (website, social)	Business owner, founder (admin)	ALL pins

How It Works:

- Every pin has a detail page** (not just a popup). Tapping a pin opens a full-screen page with tabs:
 - Overview (description, history, hours, contact)
 - Photos & Videos (community-contributed media)
 - Community Voice (endorsements, reviews, stories)
 - Location & Directions
- Community members can contribute to ANY page:**
 - Upload a photo they took at the location
 - Record or upload a short video
 - Write a memory or story ("My grandmother used to bring me here every Sunday")
 - Leave a visit tip ("Go early on Saturday — it gets crowded by noon")
- Unclaimed businesses still have living pages:**

- The business owner hasn't claimed it yet, but the community can still add photos, endorsements, and stories
- When the owner eventually claims it, all community content remains — they just gain the ability to add their OWN story video and manage the page

4. **Cultural sites and HBCUs have living pages:**

- The Manus-seeded descriptions and visit tips are the STARTING content
- Community members add their own photos, videos, and stories on top
- The founder can add content during the tour (photos, videos from visits)
- These pages grow richer over time as more people visit and contribute

5. **Admin (founder) capabilities on any page:**

- Upload photos and videos directly (no moderation delay)
- Edit descriptions and visit tips
- Pin important community content to the top
- Remove inappropriate content

Implementation Priority:

Build NOW (before tour):

- ☐ Every pin has a tappable detail page (not just a popup)
- ☐ Detail page shows the seeded description, visit tips, and historical context
- ☐ Admin can upload photos/videos to any page
- ☐ "Add a Photo" and "Share Your Story" buttons visible to logged-in users
- ☐ Basic photo upload with moderation queue

Build SOON (during/after tour):

- ☐ Video upload capability
 - ☐ Written story/memory submission
 - ☐ Visit tip submission
 - ☐ Community content moderation queue
 - ☐ "Pin to top" admin feature
-

ISSUE 6: VIBES SHOWN FOR BUSINESSES THAT SHOULDN'T HAVE THEM

Rule from Master Directory:

The following categories are marked "N/A — Use Endorsements, Not Vibes" and should NEVER show a "Community Vibes" section:

- Professional Services
- Home & Property Services
- Automotive & Transportation
- Pets & Animal Services
- Technology & Digital Services
- Financial & Business Services
- Legal & Government Services
- Other Services

These categories show "THE REAL" (professional trust tags) instead of vibes.

FIX: Check every business page. If the business's Main Category is in the list above, hide the "Community Vibes" section entirely and show "The Real" tags instead (once implemented).

VERIFICATION CHECKLIST

After implementing these fixes, Replit must provide evidence of:

- ☐ Screenshot: The Nail Jaws pin at 429 N. 64th St (NOT at city center)
- ☐ Screenshot: ISSAAESTHETICS pin in Silver Spring, MD (NOT in Philadelphia)
- ☐ Screenshot: HBCU count showing 100+ (not 74)
- ☐ Video/GIF: Clicking an HBCU in sidebar causes map to fly to that location
- ☐ Screenshot: The Nail Jaws page showing CORRECT tags from master directory
- ☐ Screenshot: No "Black Excellence" or "Worth Every Visit" tags anywhere
- ☐ Screenshot: Ownership badge says "Black / African American-Owned" (not "Verified Black-Owned")

- ☐ Screenshot: A cultural site detail page with description, visit tips, and "Add a Photo" button
- ☐ Database query: `SELECT COUNT(*) FROM cultural_sites WHERE site_type = 'hbcu' = 100+`
- ☐ Database query: No duplicate coordinates for businesses at different addresses

SUMMARY OF ALL ISSUES

#	Issue	Severity	Category
1	All businesses pinned to same location	P0 — CRITICAL	Geocoding
2	26 HBCUs missing (74 shown, 100 seeded)	P1 — HIGH	Data loss
3	Clicking sidebar items doesn't fly to location	P0 — CRITICAL	UX
4	"Verified Black-Owned" language regression	P1 — HIGH	Language
5	Wrong/invented vibe tags displayed	P1 — HIGH	Data integrity
6	No living pages for pins (photos, videos, stories)	P1 — HIGH	Feature gap
7	Vibes shown for professional categories	P2 — MEDIUM	Logic error

DO NOT mark any of these as complete without providing the verification evidence listed above.
