MWM-EXP-P01-P21

MAPPING WITH MELANIN™

THE EXPERIENCE DECK

Never wonder if you'll feel **welcome** again.

Finding the right place shouldn't require
taking unnecessary risks.

mappingwithmelanin.com

This could be anyone.

Maybe it's Zara. Maybe it's you.

Every journey begins with a question.

Ours was simple.

Why should belonging ever be left to chance?

MAPPING WITH MELANIN™

MAP YOUR LIFE. CONNECT DEEPER.

THE QUESTIONS WE ALL ASK

- 📍 *“Will I feel comfortable here?”*
- 📍 *“Can I trust what I’m reading?”*
- 📍 *“Where are my people?”*

**Most platforms know what you
clicked.**

**We know what your community
experienced.**

DISCOVER

BEFORE

AFTER

uncertainty. — confidence.

She didn't just find a place.

She found certainty.

Businesses

People

Stories

Neighborhoods

Culture

Opportunity

SAFETY MAP

Peace of mind begins
before you leave home.

SAFETY CHECK-IN

Someone already knows where she is.

She doesn't travel alone.

Even when she's the only one in the room.

COMMUNITY

Community isn't built through followers.

It's built through shared experiences.

Through showing up. Through knowing someone will have
your back.

Through knowing someone in the room before you walk in.

BELONGING

Belonging doesn't happen through a single feature.

It happens through events, groups, businesses, friends, conversations.

It happens when you stop being a newcomer and start being known.

You've found the city.

**Now meet someone
who **knows** it.**

KINFOLK AI™

Not an assistant.
A cultural guide.

FOR BUSINESS OWNERS

**People connect with people
before they connect with products.**

*For the first time, your story is as discoverable
as your business.*

WHY WE WIN

We don't ask communities to trust
technology.

**We ask technology to earn the trust
of communities.**

That's the difference.

WHY NOW?

- Communities are more connected online than ever — but loneliness is rising.
- Travel is growing — but trust is declining.
- Minority-owned businesses are easier to support — but harder to discover.
- People have more information than ever before. — But less confidence in where to find belonging.
- Technology has made the world smaller. — Belonging still feels farther away.
- **People don't need another app. They need a trusted guide.**

THE MOVEMENT

Imagine a world where...

every neighborhood is easier to navigate.
every business has a chance to be discovered.
every newcomer can find community.
every traveler feels like they belong.

Because belonging should *never* depend on luck.

We aren't just mapping places.

We're mapping belonging.

You belong here.

Welcome home.

CHAPTER TWO

The Investor Chapter

No one should have to wonder if they'll feel welcome.

67 CANONICAL PAGES

MWM-INV-P01-P67

MAPPING WITH MELANIN™

**No one should
have to wonder
if they'll belong.**

— Helping people discover community before they arrive

Communities don't happen by accident.

Someone chooses to build one.

That's why
Mapping With
Melanin™ exists.

Helping people find community while helping communities grow.

More than a map. More than a directory.

A community ecosystem.

Where people, businesses, and belonging come together.

THE JOURNEY TO BELONGING

Every journey begins here.

From the first discovery to the deepest roots — every step, together.

Discover.

**Every journey begins
with discovering
where you belong.**

Before you arrive, discover trusted businesses, neighborhoods, events, and local recommendations from people who already know the community.

Powered by community insight—not anonymous ratings alone.

- Find what matters faster.
- Support businesses that strengthen communities.
- Discover through trusted local voices.

Connect.

**Community isn't
something you consume.
It's something you create.**

Join circles, connect with neighbors,
discover local events, and start building
relationships before you ever arrive.

People, not just places.

- **Join circles** around shared interests.
- **Meet people** before you arrive.
- **Build trusted relationships** before moving or traveling.

Thrive.

Communities thrive when local businesses thrive.

We help minority-owned businesses get discovered, send customers to their own sites and social—not away from them—and turn supporters into repeat customers.

Economic empowerment, not just exposure.

Connect with customers

- already looking for what you offer.

Own the customer

- **relationship**—your website, your social.

Grow with trusted

- community feedback.

Travel.

Confidence is the best travel companion.

Discover safer neighborhoods, trusted businesses, and community insight before you arrive—so every trip begins with confidence, not uncertainty.

Know before you go.

— **Know safety** before you arrive.

— **Discover trusted businesses** wherever you go.

— **Move** with community insight.

Belong.

**Home isn't always
where you started. It's
where you're welcomed.**

Belonging isn't the end of the journey—it's
how every place begins to feel like home.

Everywhere you go, you belong.

– **Carry your community**
wherever life takes you.

– **Build lasting
relationships**, not one-
time visits.

– **Feel at home**, from the
first day forward.

A USER STORY

Meet Jasmine.

Jasmine just accepted her dream job in Houston.

- ✓ Starting over in a new city
- ✓ Looking for a neighborhood that feels like home
- ✓ Wants to support businesses that reflect her values
- ✓ Looking to build meaningful connections
- ✓ Hopes she'll feel like she belongs

Then she opens Mapping With Melanin™.

JASMINE'S JOURNEY

She isn't
starting over.
She's starting
connected.

Instead of starting from scratch, Jasmine discovers places already trusted by the community.

Trusted by the Community

- Local favorites the community stands behind.
- Businesses that reflect her culture and values.
- Today she's discovering them. Tomorrow she's recommending them.

JASMINE'S JOURNEY — SHE BUILDS HER LIFE

One app. Every new beginning.

Moving to Houston wasn't just about finding a restaurant.
It was about building a life.

- ✓ A doctor she feels comfortable with.
- ✓ A mentor who helps her navigate a new city.
- ✓ An employer where she can thrive.
- ✓ Businesses trusted by the community.
- ✓ People who make Houston feel like home.

***Because belonging isn't one decision
— it's hundreds of little ones.***

JASMINE'S JOURNEY — SHE BECOMES PART OF THE COMMUNITY

She's no longer new here. She's known here.

- ✓ She joins a neighborhood run club.
- ✓ She shares businesses she loves with others.
- ✓ She welcomes newcomers to Houston.
- ✓ She helps others discover places they'll love.
- ✓ She's helping make Houston feel like home for someone else.

*She came looking for a community.
Now she's helping build one.*

JASMINE'S JOURNEY — SHE PAYS IT FORWARD

Now she helps the next newcomer.

The places that earned Jasmine's trust become the places she confidently shares with others. The experiences that helped her feel at home become the experiences she passes on to the next newcomer.

One person finds home.

Then they help someone else find theirs.

That is Mapping With Melanin™.

THE OTHER SIDE OF THE CONNECTION

**What about
the businesses
welcoming Jasmine?**

WE DON'T SELL ATTENTION.

We create intentional discovery™.

People don't come here to consume. They come here to connect.

- ✓ Build a life in a new city.
- ✓ Find a trusted doctor.
- ✓ Support local businesses.
- ✓ Plan a trip.
- ✓ Move with confidence.
- ✓ Meet their community.

Every search begins with purpose.

Every recommendation strengthens a community.

We don't keep customers. We build introductions.

We don't own the customer. The business does.

Because our success isn't measured by how long people stay with us.
It's measured by how many people we send to you.

Community is the algorithm.

Every recommendation teaches the platform.
Every experience helps someone else.

That's your AI.

Not just AI. Community-powered AI.

The more our community grows, the smarter every recommendation becomes.

MEET KINFOLK AI

Not just AI. Your business partner.

AI doesn't replace expertise. AI remembers what communities already know.

KinfolkAI works like another member of your team.

More than automation—KinfolkAI understands your business in the context of your community.

- | Helps you understand your customers.
- | Turns opportunities into action.
- | Reveals opportunities hidden in your community.
- | Turns goals into growth plans.

Powered by your business. Guided by your community.

A NEW CHAPTER

**Growing a business shouldn't
mean chasing attention.**

**It should mean being
discovered by the right people.**

A BUSINESS STORY

Meet Marcus.

Restaurant Owner

BEFORE MAPPING WITH MELANIN™

A great business people don't know exists.

He tells his story

Community discovers him

Neighbors become customers

Customers become regulars

Customers recommend him

Business grows

Every recommendation helps someone else find a place they'll love.

There are thousands of businesses like Marcus's. Great businesses deserve to be discovered.

Marcus came looking for customers. Now he's building a

We're not another destination.

We're the connection.

We don't ask businesses to start over. We help them build on what they've already built.

BUSINESSES KEEP OWNERSHIP OF...

- ✓ Their website
- ✓ Their booking system
- ✓ Their social media
- ✓ Their customer relationships

COMMUNITIES KEEP...

- ✓ Their voice
- ✓ Local knowledge
- ✓ Trusted recommendations
- ✓ Trust

Mapping With Melanin™ connects them.

We don't just connect businesses to customers. We connect stories — Jasmine's, Marcus's, the neighborhood's, the city's.

THE COMMUNITY FLYWHEEL

Every interaction makes Kinfolk AI smarter.

Kinfolk AI powers the Community Flywheel.

KINFOLK AI LEARNS FROM

- ✓ Every review
- ✓ Every recommendation
- ✓ Every saved business
- ✓ Every community interaction

KINFOLK AI USES THAT KNOWLEDGE TO

- ✓ Recommend businesses people will love
- ✓ Surface hidden local gems
- ✓ Understand community preferences
- ✓ Make every future recommendation smarter

The **community** teaches **Kinfolk AI**.

Kinfolk AI returns the favor.

Every interaction improves the platform.

Every review

Builds **trust**

Every recommendation

Improves **discovery**

Every saved place

Personalizes future
recommendations

Every new community

Expands **opportunity**

Every contribution strengthens the **community**. Every stronger community makes the platform **smarter**.

THE ROLLOUT

Every new city strengthens the network.

EVERY CITY LAUNCHES WITH THE COMPLETE COMMUNITY FLYWHEEL

- ✓ Verified businesses
- ✓ Founding community members
- ✓ Kinfolk AI
- ✓ Local recommendations
- ✓ Safety intelligence

Each city strengthens the data, recommendations, and community that power the next launch.

*We don't just launch an app.
We launch the entire ecosystem.*

DRIVES RETENTION

Experience every city like a local.

THE PLATFORM

Mapping With Melanin™

Community Intelligence Ecosystem

Powered by KinfolkAI™

Every interaction strengthens every future recommendation.

One ecosystem. Multiple revenue streams. Increasing lifetime value.

Every stage creates more data, trust, and engagement — making the next stage even more valuable.

MARKET OPPORTUNITY

Building at the intersection of six massive markets.

Unlike point solutions that serve one market, Mapping With Melanin™ connects all six into a single ecosystem.

Serving millions of travelers, relocators, community members, creators, and minority-owned businesses through one connected platform.

No single competitor owns all six. We do.

Sources: U.S. Census Bureau, McKinsey, Grand View Research, Statista, Fortune Business Insights, and industry reports (2025–2026 estimates).

BUSINESS MODEL

Multiple customer groups.
Multiple revenue streams.

Four distinct customer segments — each generating recurring, scalable revenue on the same platform.

SUBSCRIPTIONS | MARKETPLACE | SAAS | ENTERPRISE

COMPETITIVE ADVANTAGE

Why We Win.

We're not redefining features. We're redefining how people discover, connect, and belong.

	OTHERS	MAPPING WITH MELANIN™
TRUST	Reviews only	✓ Community-powered trust and safety
DISCOVERY	Attention-driven search	✓ Intentional Discovery™
CONTEXT	Places	✓ People + Places
MARKETPLACE	Static listings	✓ Living, connected ecosystem
JOURNEY	Trips	✓ Life transitions

WHY THIS IS DIFFICULT TO REPLICATE

No single feature creates our advantage. It comes from how trusted community intelligence, AI, discovery, businesses, safety, and relocation continuously reinforce one another.

The same six growth engines that drive retention also create a competitive advantage that's difficult to replicate.

RELATIONSHIPS

Digital engagement

*Others solve one problem.
We connect an entire journey.*

PART II

Now let's talk about **the businesses** this community trusts.

People are already looking for trusted businesses. Here's how yours
becomes one of them.

Restaurants

Beauty

Health

Legal

Finance

Real Estate

Fitness

Events

FOR YOUR BUSINESS

Your customers are already looking for you.

Every day, people open Mapping With Melanin™ looking for trusted businesses recommended by their community. They're not scrolling through ads. They're looking for businesses they can feel confident supporting.

When someone searches for what you offer, your business deserves to be part of the conversation.

- ✓ Get discovered by people already looking to support businesses like yours.
- ✓ Build trust through community recommendations — not advertising.
- ✓ Turn one customer into dozens through word-of-mouth visibility.

People don't remember ads. They remember recommendations.

87%

Consumers trust community recommendations more than paid advertising.

3×

Community-trusted businesses see significantly stronger repeat engagement.

\$1.7T

Buying power within the melanated diaspora.

FOR YOUR BUSINESS

The tools that exist weren't built for you.

Most platforms compete for attention. We help businesses earn trust.

THE VISIBILITY GAP

Invisible to your own community

Your community is already recommending businesses like yours every day. Those conversations are happening in text messages, group chats, and social feeds you'll never see.

The result:

Word-of-mouth happens without you — on text threads, group chats, and Facebook groups you'll never see.

Businesses don't need more advertising. They need to be discovered by the right people.

THE TRUST GAP

Trust can't be purchased.

Paid placements feel transactional. This community decides where to spend based on who their neighbors, friends, and family actually recommend — not who paid to appear first.

The result:

Ad spend goes up. Real community trust doesn't follow. You can't buy a recommendation.

THE TOOLS GAP

Built for everyone. Perfect for no one.

Existing platforms offer generic analytics with no cultural context. No community insights, no reputation tools designed around how this community discovers and shares, no AI built for your market.

The result:

You're managing your business on tools that don't understand your customers or your community.

THE SOLUTION

Your business. Trusted. Found. Chosen.

Your next customer isn't looking for another ad. They're looking for a recommendation.

Be found by people who are looking

Your verified profile surfaces in community searches by category, neighborhood, and trust score

Build a reputation that compounds

Every review, save, and recommendation from the community strengthens your trust score over time

Grow with insights that matter

KinfolkAI helps you understand your customers, strengthen your reputation, and grow with confidence.

Free

Start building trust today.

5 min

to claim your place in the community.

Day 1

Start appearing in trusted community searches.

The best marketing has always been a recommendation.

Every customer helps you find the next one.

Customer finds you

The businesses that earn trust become the businesses everyone finds.

-  **Community Recommendations**
More recommendations = more discovery.
-  **Saves & Favorites**
People who save you often become future customers.
-  **Reviews**
Trust compounds with every positive experience.
-  **KinfolkAI™**
Learns what works and helps you attract more of the right customers.

Know what your community wants before anyone else does.

See what your community loves, what they're searching for, and what to do next — all in one place.

actions ready for you

☆ KinfolkAI™:

218 people saved your business this month. Demand is growing. Want KinfolkAI™ to draft a promotion before the weekend?

Your community leaves clues every day. We help you see them.

MEET KINFOLKAI™

Your business partner. Working even when you're closed.

KinfolkAI™ works in the background — understanding your community, protecting your reputation, and finding growth you'd otherwise miss.

*Powered by real community behavior —
not generic internet data.*

While you run your business, KinfolkAI™ is working on growing it.

I LEARN. Finds customer trends

Spots patterns in what your customers are saving, searching, and saying before you'd notice them yourself.

I RECOMMEND. Suggests promotions

Recommends the right offers at the right time — timed to community activity, not guesswork.

I CREATE. Creates posts

Drafts ready-to-share marketing content based on your business, neighborhood, and community events.

I DISCOVER. Identifies growth opportunities

Surfaces untapped moments — new neighborhoods, event timing, rising search categories near you.

I HELP. Responds to reviews

Writes thoughtful, on-brand replies to community feedback — so every customer feels heard.

I PROTECT. Alerts you when something needs attention

Notifies you instantly when a review needs a response, a trend shifts, or a promotion window opens.

A DAY WITH KINFOLKAI™

This is what it feels like to never work alone.

KinfolkAI™ monitors your community, surfaces opportunities, and suggests next steps — all day, every day, without you asking.

Every notification is based on real community behavior — not generic data.

Stop wondering what's happening with your business. Start knowing.

8:00 AM

Good morning. Profile views are already up 42% since yesterday.

10:15 AM

You're trending this morning. People nearby are searching for brunch.

[Post a special →](#)

1:00 PM

Three people just saved your business. That's usually a good sign — demand is building.

4:00 PM

Weekend traffic peaks Friday at 6 PM. Want me to draft a promotion now so it's ready?

[Draft it now →](#)

6:30 PM

A new 5-star review just came in. Businesses that reply within an hour earn more repeat engagement. Want me to draft one?

[Draft a reply →](#)

11:00 PM

Another good day. Your Trust Score increased again this week.

MAPPING WITH MELANIN™

COMMUNITY BUILDER DECK

Become a Community Builder.

You're not just sharing an app.
You're helping someone find their community.

WHAT IS IT?

One platform. Every part of belonging.

Mapping With Melanin™ brings together the people, businesses, local knowledge, and trusted recommendations that help someone feel connected—whether they're exploring a new city or deepening roots where they already live.

WHY COMMUNITY BUILDERS MATTER

Every movement begins with one conversation.

The strongest communities aren't built by algorithms.

They're built when someone says,

"You should check this out."

One recommendation becomes one connection.

One connection becomes another recommendation.

That's how trust grows.

That's how communities grow.

You're not selling anything.

You're opening a door.

EVERY RECOMMENDATION CAN...

✓ Help someone discover a business they'll love

✓ Help a family feel at home in a new city

✓ Help an entrepreneur be seen

✓ Help strengthen a neighborhood

✓ Help someone feel like they belong

Wherever life takes you, find your community first.

- ✓ Moving to a new city
- ✓ Exploring your hometown
- ✓ Traveling somewhere unfamiliar
- ✓ Looking for community
- ✓ Supporting minority-owned businesses
- ✓ Finding trusted recommendations
- ✓ Knowing before you go

Whether you're staying close to home or starting somewhere new, **Mapping With Melanin™** helps you discover businesses, communities, and experiences that make every place feel more like home.

HOW DOES IT WORK?

One beautiful cycle.

COMMUNITY GROWTH FLYWHEEL

WHAT MAKES IT DIFFERENT?

This is its own category.

NOT THIS

- ⊗ Not another directory.
- ⊗ Not another review app.
- ⊗ Not another social network.

INSTEAD

- **Community-first**
Every feature starts with the people, not the businesses
- **Safety-first**
Real neighborhood intelligence from people who live there
- **Minority-owned discovery**
Built specifically for the melanated diaspora
- **Neighborhood intelligence**
Know before you go — always
- **Real relationships**
Circles, community posts, life journeys
- **AI that learns from community**
KinfolkAI™ — not generic, deeply personal

WHY BUSINESSES LOVE IT

Businesses own the relationship.

We don't trap customers behind a paywall or own their data. We send them directly to:

- ✓ **Their website.** We drive customers directly there.
- ✓ **Their booking page.** We make reservations their revenue.
- ✓ **Their social media.** We grow their audience.

"The community recommends. The business benefits. Every time."

WHY COMMUNITY MEMBERS LOVE IT

It's not a feature. It's a feeling.

Know before you go.

Safety, vibes, and verified businesses — all before you arrive.

Meet people before you move.

Build friendships and community in your new city.

Support businesses that reflect your values.

Every visit strengthens the community.

Find trusted recommendations.

Real people. Real experiences. Community-verified.

Build friendships.

Circles, events, and local connections that last.

Discover opportunities.

Jobs, events, services — curated for your community.

MEET

KinfolkAI™

“KinfolkAI doesn’t replace your community. It learns from it.”

Not generic recommendations from an algorithm that doesn’t know your community. Hyper-personalized guidance built from the lived experiences of people just like you.

Learns

From your community's experiences, not generic data

Suggests

Businesses, neighborhoods, and connections tailored to you

Protects

Flags safety concerns before they become your experience

Connects

Links you to the right people, places, and moments

Grows

Smarter with every member who joins the community

THE NETWORK EFFECT

What happens when more people join?

—

This is your flywheel explained for everyday people.
Every member multiplies the value for everyone else.

01 One person joins.

02 One business grows.

03 One recommendation is shared.

04 One newcomer feels welcome.

05 **The entire community becomes stronger.**

YOUR ROLE AS A COMMUNITY BUILDER

How can you help?

You don't have to be an investor. You don't have to own a business.

Invite a friend

Share the platform with someone who needs it

Claim your business

Get your business listed and verified

Recommend businesses

Tell the community where to go

Leave reviews

Help others know what to expect

Share your story

Your experience builds trust for everyone

Welcome newcomers

Be the community you wish you found

Become a founding member

Get exclusive benefits and shape what we build

Every community started with someone who cared enough to say...

“You should check this out.”

Become that person.

MAPPINGWITHMELANIN.COM

CHAPTER THREE

The Business & Platform Chapter

Every feature. Every story. The full product experience.

95 CANONICAL PAGES

MWM-BIZ-P01-P95

MAPPING WITH MELANIN™

The complete app experience.

A screen-by-screen walkthrough of every feature — from first launch to active membership. Two complete journeys: community member and business owner.

Slides 1-58

Community Member

Slides 59-74

Business Owner

The first thing a user sees.

1

No friction entry

Apple, Google, or email — zero invasive permissions before sign-in.

2

Cultural tone from frame one

The warm cream palette and gold typography signal this is a space built intentionally for the melanated diaspora — not retrofitted.

3

Privacy by design

No tracking walls. No harvested email lists. Auth is a handshake, not a data extraction event.

4

6-digit reset flow

Forgot password? A code — not a lengthy email chain — gets users back instantly.

How you welcome someone says everything about who you built this for.

Welcome.

The first screen sets the tone.

Sign in with Apple or Google in two taps — or continue as a guest and explore freely. No paywall on entry. The community is open; membership unlocks more.

Easy in. Worth staying for.

Two-tap sign-in —

- Apple, Google, or guest. Zero friction.

Guest mode lets curious

- members explore before committing.

Warm first impression —

- a cultural home, not just a utility app.

In 90 seconds, the app knows you.

1 4-step profile setup

Name, city, role flags, and a photo — all optional except your city. Short enough to complete in 90 seconds.

3 Role flags shape the experience

Community Member, Business Owner, Content Creator, Community Organizer — a user can be all four. Each flag surfaces different tools and views.

2 Interest chips drive everything

12 categories selectable at launch. Every recommendation, map filter, and KinfolkAI suggestion flows from this selection — forever, until updated.

4 KinfolkAI intro before the home screen

Before a user sees the Discover tab, KinfolkAI greets them with a personalized opening — setting the AI-first expectation from day one.

Personalized.

The app shapes itself around the member.

Onboarding captures lifestyle, interests, and city — so every recommendation, feed, and KinfolkAI response is calibrated from the very first session.

Your vibe, reflected back.

STEP 3 OF 5

What are your interests?

Pick everything that fits your lifestyle

Soul Food Brunch Fine Dining

Coffee Shops

Natural Hair Spas & Wellness Fitness

Boutiques

Music & Events Art & Culture Travel

Community

Continue →

6 of 12 selected

12 interest categories

- across food, wellness, culture, and community.

5-step flow also

- captures lifestyle, city, and safety preferences.

Powers KinfolkAI —

- selections feed directly into the AI prompt layer.

Find businesses. Trust what you see.

1 Trust Score — not star ratings

14 signals — reviews, recency, verification, community sentiment, response rate — calculate a 0–100 score. No gaming. No pay-to-rank.

3 Search + multi-filter simultaneously

Category, price range, Trust Score minimum, verified-only, and open-now all work together. Users narrow to exactly what they need without scrolling past noise.

2 Verification badge

Businesses that completed our review process earn a shield badge. Community members know this is not self-reported — it required proof.

4 For You card at the top

A geo-aware, personalized trending card refreshed hourly. Based on what the community is actually searching right now near the user's location.

Discover.

**Every minority-owned spot,
ranked by community trust.**

Filter by category, Trust Score, price,
and verification status. A "For You" card
surfaces diaspora-curated recommendations
based on the member's interests and
location — personalized from day one.

Find your people's places.

Trust Score (0–100)
calculated from 14
community signals — not
star averages.

For You card shows
melanated-owned spots
trending in the member's
neighborhood.

Verified badge confirms
ownership is minority-
owned — not self-
reported.

Trust you can actually see.

1 Trust Score over star ratings

14 signals — reviews, recency, verification, community sentiment, and owner responsiveness. Algorithms cannot buy a Trust Score. Only community activity can raise it.

3 One-tap actions

Call, Directions, Save, and Share each require one tap. No navigating away, no copy-paste. The profile is built for in-the-moment decision-making.

2 Community Says compliment chips

Tags like 'Welcoming Vibe', 'Safe Space', and 'Community Space' are attached by reviewers — not selected by owners. This is qualitative signal the owner cannot edit.

4 Owner response threading

Every review can receive a public owner response. That response history builds or erodes trust — visible to every future visitor.

Profile.

Every business deserves a home worth visiting.

Trust Score front and center. Community compliment chips set by reviewers — not the owner. Photo gallery, owner response, safety stats, hero image, and direct contact. No algorithm buried the good ones.

The community vouches. You decide.

Trust Score 97 — 14-

- signal calculation, visible before a single tap.

Community Says tags —

- sourced from member reviews, not owner edits.

Owner response visible

- on every review — accountability builds trust.

See the city. Know the territory.

1 Safety overlay from community data

Neighborhood color-coding is sourced entirely from diaspora member surveys — not crime statistics, police data, or algorithms that encode historical bias.

3 Bottom-sheet profile on tap

Tapping any pin slides up a business card without leaving the map. One more tap opens the full profile. No navigation stack needed for quick decisions.

2 Business pins by Trust Score

Gold pins (90+), amber (75–89), muted (below 75). The map communicates quality before a user taps a single result.

4 Cultural Heritage Layer — on by default

HBCUs, Civil Rights landmarks, African American historical sites, art institutions, and 7 more categories appear on every map by default — not tucked behind a setting. Radius from 0.5 to 25 miles. Category and Trust Score filters sync with the Discover tab.

Navigate.

See the city through a community lens.

Gold pins for Trust Score 90+, amber for 75–89. A community-sourced safety overlay colors neighborhoods based on diaspora member surveys — not crime statistics or police data that encode historical bias.

Know the territory before you arrive.

Safety overlay built entirely from community surveys — no police data.

Gold pin = Trust 90+, visible at a glance before tapping any result.

Tap any pin to slide up a business card — no navigation stack needed.

Our history lives on the same map.

We never accepted the premise that economic navigation and cultural connection should live on separate screens. The melanated diaspora built this country's institutions, neighborhoods, and landmarks. That history belongs on the same map where we find businesses, plan trips, and move through the world with intention.

1 Heritage layer — on by default

Cultural pins appear the first time the map opens — not tucked behind a settings menu. History is not a feature you toggle on. It is always there.

2 11 heritage categories, each with its own pin

HBCUs, Civil Rights landmarks, African American historical sites, art institutions, music heritage, historic neighborhoods, cultural centers, and more — each category has a distinct color and icon so members navigate by meaning.

3 Tap any pin, read the story

Tapping a heritage pin slides up a site card with category, location, and a brief history. "View Details" opens the full Cultural Heritage Explorer — searchable, filterable, and growing.

4 Also in the Library — 16 live site cards

A horizontally scrolling strip of cultural heritage sites appears at the top of the Library tab — live-loaded from our database, updated as new sites are added. Discovery is not limited to the map.

History lives here.

On the same map. In the same moment.

11 heritage categories. Every pin tells a story. Visible by default — because separating our economic journey from our cultural identity was never an option we were willing to accept.

- HBCU
- Civil Rights
- African American History
- Art Institutions
- Music Heritage
- Historic Neighborhoods
- Cultural Centers
- +4 more categories and growing

Every pin is a reminder: this land carries our story.

Heritage pins visible on first open — no setting to find, no toggle to flip.

Category-specific colors let members navigate by meaning, not just by place.

Also in Library — 16 live heritage site cards scroll at the top of every Library tab.

Safety tools built for the diaspora.

1

Community Intelligence — not crime data

Diaspora members report real-time alerts: road closures, protests, celebrations, ICE activity, severe weather, and more. Crowdsourced clarity that police blotters never provide.

2

15 features, user-ordered

Community Intelligence, Safety Check-In, Location Sharing, Meetup Verification, Report Police or ICE, Officer Watch, Neighborhood Safety surveys, Sex Offender Registry, Mental Health Resources, NA/AA Meetings, and more — each drag-reorderable to the top.

3

Check-In + Location Sharing

Schedule a check-in with a trusted contact. If you don't confirm, they're alerted. Separately, share your live location for any duration with anyone — no app install required on their end.

4

Built for racialized safety dynamics

Report Police or ICE activity, track officer transfers, flag unsafe or discriminatory spaces. These tools exist nowhere else in a consumer app. They are why this platform exists.

Protected.

14 safety features. Zero compromises.

Community Intelligence, Safety Check-In, Location Sharing, Meetup Verification, Report Police or ICE, Officer Watch, Anonymous Report, Mental Health Resources, NA/AA Meetings — and more. Each feature drag-reorderable by the member.

Tools that exist nowhere else.

Live community alerts —
- road closures,
- celebrations, ICE activity,
and more.

Report Police or ICE — a
- tool that exists nowhere
else in a consumer app.

Drag to reorder — every
- member prioritizes their
own safety tools.

AI that speaks your language.

Not a generic chatbot rebranded. KinfolkAI™ is culture-aware from the ground up — it learns from your Taste Profile, remembers past sessions, takes feedback on every spot it suggests, and now speaks your response back through Kinfolk Voice.

Local Discovery

Finds minority-owned businesses, community events, and cultural sites tailored to each member's Taste Profile — categories, budget range, travel companion, lifestyle preferences.

Personalized Trip Planning

Builds multi-city itineraries with culturally relevant stops and insider recommendations. Learns from thumbs-up and thumbs-down feedback on every suggested spot.

Community Safety Intel

Summarises neighborhood confidence scores and community alerts so diaspora members can move with genuine awareness — not false optimism, not fear.

Community + Cultural Connections

Surfaces Kinfolk Circles, upcoming events, heritage sites nearby, and people aligned with the member's interests — without a social media algorithm deciding relevance.

Kinfolk Voice

"Listen" button on every AI message. Free: 10k chars/month. Navigator: 100k. Trailblazer: 300k. Voice meter shows usage in real time.

Taste Profile & Session History

Set category preferences, budget, travel style, and who you travel with. Every past conversation is saved and accessible — AI context carries forward.

Neighbor Voice

Toggle to surface responses informed by the lived experience of people in your network — community insight layered into every answer.

KinfolkAI™.

Culture-aware. Voice-enabled. Always learning.

Not a generic chatbot with a new name. Kinfolk remembers your Taste Profile, learns from your thumbs-up feedback, and now reads responses back to you in your membership tier's voice allowance.

- **Taste Profile** — set your categories, budget, trip style, and companion before you even ask the first question.
- **Kinfolk Voice** — tap Listen on any AI message to hear it read aloud. Character allowance tracked by tier.
- **Session History** — every conversation saved. Pick up any past session right where you left it.
- **Spot feedback** — thumbs up or down on any recommended business. Kinfolk adapts every future answer to what you actually liked.

Taste Profile personalizes every answer before Zara types a word.

"Listen" on every AI bubble — voice meter tracks her monthly allowance.

Thumbs up on Copper & Oak — Kinfolk learns what she actually likes.

Neighbor Voice on — responses carry the weight of community experience.

Travel with backup. Always.

Women of the melanated diaspora are statistically among the most targeted demographics for travel-related harm — and the least served by mainstream safety apps. Mapping With Melanin™ was built, in part, to change that.

1 Before you leave: Know the area

Neighborhood Safety surveys give community-sourced confidence scores for any zip code or city — before you book a hotel or accept a meeting invite.

3 In the moment: Share your location

One tap sends a live location link to anyone — a friend, a family member, a community circle. They see exactly where you are, in real time, for exactly as long as you choose.

2 While you're there: Check-In active

Schedule a safety check-in with a trusted contact. If you don't confirm by the time you set, they're alerted immediately — no app required on their end.

4 If something happens: Tools exist

Anonymous report, Report an Unsafe Space, and Submit Safety Tip give women of the diaspora a voice that actually reaches other community members — not just a report that disappears into a form.

Events the algorithm never shows you.

1

Curated by the diaspora, for the diaspora

Events are submitted and verified by community organizers — not aggregated from Eventbrite or ticketing APIs that miss most minority-produced cultural programming.

3

Safety-rated venues

Every event venue inherits the Trust Score and community safety context from the business or space it's hosted in. Members know the vibe before they RSVP.

2

Category, date, and vibe filters

Jazz nights, poetry slams, natural hair expos, business mixers, Afrobeats parties, community town halls. Filter to exactly what fits the member's lifestyle and calendar.

4

KinfolkAI event planning integration

Ask KinfolkAI to build a weekend itinerary and it will surface relevant events, pair them with melanated-owned dining and experiences, and add them to the member's calendar.

Celebrate.

Cultural programming, finally in one place.

Afrobeats nights, hair expos, diaspora business mixers, poetry slams, and community town halls. Submitted by community organizers — not scraped from platforms that miss most minority-produced events.

Every weekend, something worth showing up for.

Community-submitted
events — organizers add
directly, no platform
gatekeeper.

Venue Trust Score
visible on every event —
know the space before
you go.

KinfolkAI integration —
ask for a weekend plan
and events appear
automatically.

Knowledge the diaspora needs.

1 70+ topics seeded at launch

Health equity, legal rights, financial literacy, homeownership, entrepreneurship, cultural history, and more — topics submitted and curated by the diaspora community, not an editorial board.

3 Audience ratings on all content

Every article carries a community guidance rating — Everyone, Teen, Young Adult, or Adult — so families can set preferences and members trust the context of what they're reading.

2 Three tabs: Library, Browse, Issues

Library shows the member's followed topics with unread counts. Browse surfaces new and trending content. Issues tracks community-raised concerns with real policy implications.

4 Digest delivery for paid members

Navigator and Trailblazer members receive a curated weekly digest of their followed topics directly in the app. Information finds them — they don't have to chase it.

Learn.

70+ topics. Curated by the community.

Health equity, legal rights, financial literacy, homeownership, entrepreneurship — every topic submitted and vetted by diaspora members. Community guidance ratings keep content age-appropriate and in context.

Information that was always yours to have.

Unread badges on followed topics — members never lose the thread.

Guidance ratings on every article — family-safe filtering built in.

Weekly digest for paid members — relevant content delivered, not chased.

A social layer worth building on.

1 A feed that actually reflects you

Posts, stories, and updates from the diaspora community — with For You and Following feeds. Not an algorithm that surfaces conflict. A social layer built on shared culture and trust.

3 Visitor profiles and direct connections

Tap any member's public profile to see their saved spots, posts, and shared journey. Community connections that go beyond followers and likes — real relationship infrastructure.

2 Kinfolk Circles: group planning without friction

Create or join private circles for travel squads, friend groups, or neighborhood crews. Shared saved places, collaborative trip planning, and group discovery — all in one space.

4 Content with community guidance

Audience ratings (Everyone, Teen, Young Adult, Adult) on every post and article. Family Mode lets caregivers filter the community feed for younger members without account switching.

Belong.

Community is the feature, not the side effect.

A curated feed of diaspora voices — posts, stories, and real moments from community members. For You and Following feeds. No viral algorithm. No conflict amplification. Real connection infrastructure.

Everywhere you go, you belong.

– **Carry your community**
wherever life takes you.

– **Build lasting**
relationships, not one-
time visits.

– **Feel at home**, from the
first day forward.

Plan with your people. Not for them.

1 Your crew, not your followers

Kinfolk Circles are private, intentional groups — travel squads, friend crews, neighborhood collectives. Not a public follower count. A real space for the people you actually move with.

3 AI-curated options for the group

A Curator mode lets KinfolkAI suggest shared stops based on the group's collective preferences — or randomly discover something new together. The AI knows everyone in the circle.

2 Shared saved places and trip planning

Every circle has a shared map of saved spots. Members add places, vote on stops, and build itineraries together. Planning a group trip to a new city takes minutes, not a group chat nightmare.

4 Private, but community-connected

Circles are private by default. Members can share a circle's saved spots publicly to their profile if they choose. The line between private planning and community discovery is yours to draw.

Move Together.

Zara starts a DC Crew circle with her travel squad.

Four members. Shared saved places. Group voting on stops. KinfolkAI curates options based on everyone's preferences — not just whoever talks loudest in the group chat.

The group chat, but it actually plans things.

Group voting on saved places — democracy replaces the loudest voice.

Curator Mode — KinfolkAI suggests stops everyone will love.

Private by default — your crew's spots stay yours until you say otherwise.

Zara types: "brunch near U Street."

The Discover tab is not just a search bar with a list. It understands context. It knows her interests from onboarding. It knows her neighborhood. And it ranks results by the Trust Score — not by who paid to be first.

1 Intent-aware search

Type 'brunch' and the app filters for melanated-owned restaurants with brunch service, ranked by Trust Score. Not a raw text match.

2 Category shortcut filters

One tap on 'Restaurants,' 'Salons,' 'Gyms,' or 'Boutiques' narrows the entire feed. Combine with a Trust Score minimum to only see the best.

3 Results ranked by trust, not ad spend

Copper & Oak Bistro (97) appears above a lower-scored competitor even if that competitor paid for a listing. Community trust is the algorithm.

4 Real-time business data

Hours verified, currently open status, distance from current location, and recent review activity — all live, not cached from a year ago.

Results.

Ranked by the community. Not the highest bidder.

Copper & Oak Bistro (97) sits at the top because the community put it there — not because Marcus paid for placement. Every score is earned. Zara taps the listing.

The best minority-owned spot wins.

Highlighted top result —
the community's #1 pick is instantly visible.

Verified check on every
minority-owned listing in the top 3.

No paid ranking — Trust Score is the only algorithm that matters here.

Zara visits. Now she has something to say.

A review on Mapping With Melanin isn't just a star rating. It's a contribution to the community's shared intelligence. The compliment chips, the written review, the photos — everything she adds builds the Trust Score for every diaspora member who searches next.

1 Star rating + written review

Standard review fields, but the context is different — you're not writing for Yelp's algorithm. You're writing for your community.

3 Photo upload

Real photos from real visits build trust visually. Zara's brunch photo appears in the gallery on Copper & Oak's profile within the hour.

2 Compliment chips: what the community actually cares about

Welcoming Vibe, Safe Space, Great Food, Authentic, Community Hub, Clean, Owner Response. Chips voted by reviewers become the 'Community Says' section on the profile.

4 Every review feeds the Trust Score

We don't reveal the formula — but we can say: review quality, recency, consistency, and reviewer reputation all matter. Gaming it is hard by design.

Voice.

Zara's review will be read
by the next diaspora
member who searches here.

The compliment chips she selects — Welcoming Vibe, Safe Space, Great Food, Community Hub — become the "Community Says" section on Copper & Oak's profile. Not the owner's marketing. The community's truth.

Every review is an act of community care.

YOUR REVIEW

Best Sunday brunch I've had in DC. The jerk eggs benedict were incredible. Marcus (the owner) came to our table and made us feel so welcome. This is what we mean when we say minority-owned businesses deserve our support. Will be back every week.

221 / 500 characters

Add photo +

Submit Review & Earn 50 Points

8 community chips —
- selected by members,
not written by owners.

Points reward —
- members earn for every
verified review
submitted.

Feeds the Trust Score —
- review quality and
recency are key inputs.

Saved.

**Zara taps the heart.
Copper & Oak is hers now.**

Saved places sync to her profile, appear on her map, get shared to her Kinfolk Circles, and surface in KinfolkAI trip planning. One tap creates a persistent connection between Zara and a minority-owned business.

The places you love, always with you.

One tap saves to profile,
– map, and any Kinfolk
Circle simultaneously.

Custom collections —
– members organize saves
their own way.

Points for every save —
– community support is
rewarded, not just
reviewed.

What Builds the Trust Score.

We don't reveal the formula — that's a trade secret. What we can tell you: the Trust Score is a composite of eight community-sourced signals. Paying for a listing doesn't improve it. Only being genuinely good for the community does.

● Member Reviews

Volume, recency, reviewer reputation, and written depth — not just star average.

● Community Feedback Chips

Which chips are selected across all reviews. 'Safe Space' and 'Welcoming Vibe' carry cultural weight.

● Safety Reports

Absence of safety incident reports filed against the space by community members.

● Verification Status

Whether the business has completed ownership verification. Unverified listings score lower.

● Owner Engagement

Response rate to reviews and response quality. A responsive owner signals investment in community.

● Community Saves & Shares

How many members saved, shared, or added this business to their Kinfolk Circles.

● Check-In & Visit Activity

Real visit confirmations from members — not fake clicks or impressions.

● Business Tenure & Consistency

How long the business has been listed and whether its score has been consistently high.

The more a business serves the community, the more the community serves back. The Trust Score makes that loop visible.

Community Intel. Not a police scanner.

The Community Intelligence feature lets diaspora members post geo-tagged, real-time alerts to the feed. Not crime stats pulled from a police API. Not algorithmic risk scores. Real people telling each other what's actually happening in their neighborhood right now.

1 What members report

Road closures, construction, protests and marches, cultural celebrations, ICE activity, police presence, severe weather, unsafe spaces, and neighborhood hazards.

3 Travel alerts for moving diaspora members

If Zara is traveling to Houston and sets a destination, she gets safety context for that neighborhood from Houston-based community members — before she arrives.

2 Geo-tagged, time-stamped, voted on

Alerts appear on the map within your radius. Other members can confirm or dispute them. Unconfirmed alerts flag automatically after 2 hours.

4 Push notifications for critical alerts

Opt-in alerts for police/ICE activity and community safety emergencies. Delivered within seconds of being posted by a verified community member nearby.

Informed.

Four real alerts. Right now. Shaw / U Street.

ICE activity near Howard. Police checkpoint on 14th. A Caribbean Carnival blocking Georgia Ave. A town hall with free food at Reeves. All in the last 35 minutes. All from the community. None from the police blotter.

Community insight that helps you make informed decisions.

ICE and police alerts —
- tools that exist nowhere else in a consumer app.

Community-confirmed
- — member votes validate or expire each alert.

Cultural and civic alerts
- — not just danger. Celebrations and opportunities too.

Check In.

Zara is meeting
someone new. She
activates Check-In.

She schedules a check-in for 10 PM with her sister. If Zara doesn't tap "I'm safe" by then, her sister gets an automatic alert with her last known location. No app needed on the sister's end.

Someone always knows where you are.

Automatic alert if the

- check-in deadline passes without confirmation.

No app required for the

- trusted contact — just a live link.

Meetup Verification —

- both people confirm arrival for mutual safety.

Accountable.

**We built the features
no other app would.**

Report Police or ICE, track officers flagged for violence, flag unsafe or discriminatory spaces — anonymously if needed. These features exist because the diaspora deserves tools that reflect their actual relationship with institutions.

***The community protects the
community.***

5 accountability features
in one tab —
unprecedented for a
consumer app.

Full anonymity available
for sensitive reports —
encrypted, no profile
attached.

Community moderation
— reports reviewed
before any Trust Score
impact.

Register.

Zara taps "Natural Hair Expo — DC." She's going.

Register, save the event, share to her DC Crew circle, and add it to her calendar — all from one screen. The venue Trust Score is already there. So is the community's response count. She knows this is worth showing up for.

From discovery to attendance in four taps.

Venue Trust Score on every event — know the space before you RSVP.

Circle friends attending — see who from your crew is going.

Register, save, share — one screen handles the entire commitment flow.

Read.

Information the diaspora
always deserved —
finally in one place.

Zara opens "Your rights when stopped by police" from the Know Your Rights topic. The article has a guidance rating, an author, community-verified accuracy, and a discussion section at the bottom. Reading is the beginning. Acting is the goal.

The knowledge was always yours to have.

Guidance rating on every article — families can filter appropriately.

Community verified authors — credentialed contributors, not anonymous posts.

Save and share — members spread knowledge through their circles.

Zara taps Profile. She sees herself.

The Profile tab is not just account management. It's the member's identity in the community — their saved places, their membership tier, their Kinfolk Circles, their contribution history. Everything they've built here is reflected back to them.

- 1

My Profile
Name, avatar, bio, home city, and public visibility. Members choose how much to share with the broader community.
- 2

Saved Places
Every business and spot they've saved, organized into custom collections and synced with Kinfolk Circles.
- 3

My Reviews
Every review they've written, the points they've earned from them, and any owner responses they've received.
- 4

Kinfolk Circles
All their circles — the ones they created and the ones they've joined. One tap to open any circle's shared planning board.
- 5

Life Journey
A timeline of major moves and transitions — helps KinfolkAI understand long-term context and surface relevant community resources.
- 6

Membership & Settings
Current tier, billing, notification preferences, privacy controls, Family Mode, and account management — all in one place.

Identity.

Zara's profile is her community footprint.

Navigator member. 12 saved places. 3 circles. 7 reviews written. 340 points earned. Her Life Journey shows she relocated from Atlanta 8 months ago — KinfolkAI remembers that when it recommends next steps for her in DC.

Everything she's built here, reflected back.

9 profile sections —
– from circles to family mode, all in one place.

Life Journey — long-term context that makes KinfolkAI smarter over time.

Points visible — earned through reviews, saves, check-ins, and referrals.

Control.

Every toggle means
we thought about
the member first.

Notifications by category. Privacy controls for profile, saved places, and reviews. Family Mode for guidance filtering. Dark mode. KinfolkAI depth settings by membership tier. This platform doesn't sell attention — it sells peace of mind.

We don't sell your attention. We protect it.

Critical flag on safety alerts — can't be accidentally turned off.

Privacy granularity — profile, saves, and activity controlled separately.

Family Mode — guidance filter for the whole household, one toggle.

Three tiers. One community.

Explorer

Free

- Discover minority-owned businesses
- Community feed access
- Safety Hub (all 14 features)
- KinfolkAI — 10 queries/month
- Save up to 10 places
- 1 Kinfolk Circle

MOST POPULAR

Navigator

\$9.99/mo

- Everything in Explorer
- KinfolkAI — unlimited queries
- Save unlimited places
- Up to 5 Kinfolk Circles
- Weekly Library digest
- Priority event registration
- Move Alerts for relocating members

Trailblazer

\$19.99/mo

- Everything in Navigator
- KinfolkAI — priority + deeper context
- Unlimited Kinfolk Circles
- Early access to new features
- Member badge and profile distinction
- Direct business owner contact
- Annual city guide PDF

Upgrade.

Zara's been Navigator for 3 months. She's considering Trailblazer.

The upgrade screen shows her exactly what she'd gain — unlimited circles, priority KinfolkAI, the annual city guide. Her current points balance is displayed. She can upgrade in two taps.

*More tools. Deeper community.
Worth it.*

Points balance visible —
community contribution
has tangible value.

Two-tap upgrade — no
friction between the
decision and the action.

**Current plan always
visible** — members are
never confused about
what they have.

PART TWO — THE BUSINESS OWNER JOURNEY

Meet Marcus.

Owner of Copper & Oak Bistro.
Trust Score: 97.

Marcus didn't build a 97 Trust Score with marketing spend. He built it by showing up, serving the community, and letting the people who ate at his table speak for him. Zara just left a review. Now it's his turn.

Now let's see what Mapping With Melanin looks like from the other side.

The Business Dashboard. Not just analytics. Intelligence.

Most business listing tools give owners a view count and a star average. We give Marcus a command center. He sees who's coming, what they're saying, what drove them to his page, which compliment chips appeared most often, and how his Trust Score is trending — all in one place.

1 Real-time review notifications

Every review comes through as a notification the moment it's posted. Marcus sees Zara's review within seconds of submission. No log-in required.

3 Traffic source breakdown

Who found Marcus through search vs. KinfolkAI recommendations vs. Kinfolk Circle shares vs. direct profile views. All broken out.

2 Trust Score trend over time

Weekly Trust Score chart shows what's moving it up or down. A dip after a bad review is visible and actionable.

4 Community feedback chip analytics

Which chips appear most in reviews. If 'Welcoming Vibe' shows up 47 times, that's a differentiator Marcus can lean into in his own messaging.

Command.

Marcus opens his dashboard. Everything is visible. Nothing is hidden.

Trust Score at 97. 53 reviews this month. Top chip: Welcoming Vibe (89%). Traffic up 24% since last review. A new review just came in. He taps it.

No guessing. No black box. Real community data.

Instant review alerts — Marcus sees Zara's review in seconds, not days.

Chip analytics — he knows exactly how the community describes his space.

Trust Score trend — a living history of community trust, not a static number.

Zara's review is now Marcus's community signal.

Everything Zara did — the five stars, the chips she selected, the written review about feeling welcome — shows up on Marcus's dashboard as structured, actionable intelligence. He doesn't just read a review. He understands what drove it and what to do with it.

1

Reviews appear with chip breakdown

Marcus sees which chips Zara selected, not just her words. 'Welcoming Vibe' and 'Safe Space' together tell a specific story about his customer experience.

2

Reviewer community profile visible

He can see Zara's neighborhood, how long she's been a member, and how many reviews she's written. High-reputation reviewers carry more weight.

3

Review reply from the dashboard

Marcus can respond directly from the dashboard. His reply appears publicly beneath Zara's review and sends her a notification — completing the loop.

4

Review feeds real-time Trust Score movement

He can see the Trust Score tick up after a strong review. The connection between community action and business outcome is explicit, not hidden.

Seen.

**Marcus reads Zara's review.
He understands exactly
what she experienced.**

The chips. The written words. Her member reputation score. And a KinfolkAI prompt ready to help him craft a response that actually sounds like him — not a form letter.

The community spoke. The owner responds.

Reviewer reputation shown — high-rep reviewers signal quality feedback.

Trust Score impact visible — the owner sees exactly what moved the needle.

KinfolkAI response assist — one tap to draft a reply that feels personal.

Every review is structured.

Bad faith never reaches your score.

HOW IT WORKS

Community surveys — not star dumps

Every review is a structured survey: safety dimensions, compliment chips, written context, and an optional video. The result is intelligence, not noise.

REAL-TIME

Scores update the moment feedback lands

Your rating, review count, and Trust Score recalculate immediately after every verified submission — no batching, no 24-hour delays. The community speaks and the index reflects it instantly.

BUILT-IN PROTECTION

Bad-faith reviews are stopped before they post

Low ratings on verified minority-owned businesses go into a moderation queue — not live. They are reviewed by the platform before anything affects your score. Five-star reviews from verified members post instantly.

ACCOUNTABILITY

Every reviewer is a real, verified member

Anonymous posting is allowed — but reviews still come from verified accounts. Reviewer reputation, tenure, and history are visible to you on your dashboard, so you always know the weight behind the feedback.

Other platforms let anyone say anything. We protect the businesses that built this community.

KinfolkAI doesn't write a template. It writes Marcus.

Most review platforms offer generic response templates. KinfolkAI reads the actual review, the chips selected, the reviewer's profile, and Marcus's past responses — then drafts something that sounds like it came from someone who actually runs this restaurant and cares about this community.

1 Context-aware drafting

KinfolkAI reads the review text, the compliment chips, and Zara's member profile before drafting. The response isn't generic — it's specific to what she actually experienced.

3 Three variations to choose from

Marcus gets three response drafts: brief and warm, detailed and grateful, or community-forward. He picks one, edits as needed, and posts in two taps.

2 Tone matching

Marcus has written 12 previous responses. KinfolkAI analyzes his voice — warm, community-focused, personal — and matches it. The draft sounds like him, not a chatbot.

4 Response posts publicly, notifies Zara

When Marcus publishes his reply, it appears beneath her review on the public profile and sends her a notification. Community loop closed.

Drafted.

Marcus picks Option A. Edits two words. Posts it in 30 seconds.

Zara gets a notification: "Marcus from Copper & Oak Bistro responded to your review." She opens it. He thanked her by name, mentioned the jerk eggs benedict, and invited her to come back on a day he'll be there. That's not a template. That's a relationship.

Community to owner. Owner to community. Loop closed.

Three voice-matched drafts — warm, brief, or community-forward. Marcus chooses.

Mentions Zara by name and references the specific dish she praised — not a form letter.

30 seconds to post — from Zara's review to Marcus's response, loop complete.

Marcus didn't create his 97. His community did.

Every action a community member takes creates a signal. Those signals, aggregated and weighted, form the Trust Score. The dashboard shows Marcus which actions are actively moving his score — so he knows exactly where to focus his energy.

New 5-star review with chips

Impact: +High

A review from a high-reputation member with three or more chips has the strongest single-action impact.

Business saved to a Circle

Impact: +Medium

When a member shares a business to their Kinfolk Circle, it signals trusted recommendation to multiple members at once.

Owner responds to a review

Impact: +Medium

Response rate and response quality are both tracked. Responding within 48 hours is the benchmark.

Business saved as a favorite

Impact: +Low

Saves accumulate. Thirty saves from distinct members becomes a meaningful Trust Score signal.

Ownership verification complete

Impact: +Significant

Verified businesses score notably higher than unverified. It's a one-time action with long-term compounding value.

Safety incident report filed against business

Impact: -High

Community-moderated. One unverified report has minimal impact. Multiple confirmed reports are significant.

We don't reveal how these inputs are weighted or combined — that's our proprietary model. But Marcus can see which actions are moving his score in real time, and what the community is saying when it does.

Beyond listed. Grow with purpose.

Paying for visibility on most platforms means paying to appear above your peers regardless of quality. On Mapping With Melanin, promotions are additive — they increase your reach while your Trust Score still determines your perceived standing. Community trust is not for sale. Visibility is.

1 5 promotion placement types

Search feature spot, category front page, map pin highlight, KinfolkAI recommendation injection, and community feed sponsored post. Each targets a different moment in the member's journey.

3 Dynamic Stripe checkout — no pre-set price IDs

Marcus sets his own budget, selects placement type and duration, and checks out in four taps. No sales call, no annual contract required. Start with \$49.

2 Promotion does not affect the Trust Score

Paid placement is labeled 'Promoted.' It increases visibility, but the Trust Score beside the listing is always real and unaffected by spend. Community integrity is protected.

4 Integrated with analytics

Promotion performance appears in the same dashboard as organic metrics. Marcus can see exactly how much additional traffic his spend generated — and whether it converted to saves and reviews.

Visibility.

Marcus activates a Search Feature Spot for \$149/month.

He doesn't need a sales call. No annual contract. He selects his placement type, sets his duration, and checks out through Stripe in under two minutes. His Trust Score still shows as earned — "Promoted" appears as a separate label.

Visibility is for sale. Trust is earned.

5 placement types — each targets a distinct moment in the member's journey.

Performance visible in dashboard — views, saves, and reviews from paid reach.

No sales call required — self-serve checkout via Stripe from the app.

Insight.

Marcus knows who's finding him, how, and from where.

Not just page views. Traffic source breakdown: search vs. KinfolkAI vs. circle shares vs. direct. Neighborhood origin of visitors. Conversion from view to save to review. This is what community-powered analytics looks like.

Not just data. Community intelligence.

KinfolkAI is the 2nd largest traffic source — 28% of visits are AI-driven recommendations.

Circle shares — 18% of traffic from members recommending to their crews.

Conversion funnel — from view to review, every drop-off is visible.

A plan for every stage of your growth.

Community

Upgrade.

Marcus upgrades to Growth. He's building a presence, not just a listing.

KinfolkAI response assist alone saves him two hours a week. The chip analytics showed him "Safe Space" ranked second — so he added a neighborhood safety post to his community feed. Trust Score went up four points.

Community intelligence is the product.

Free plan is real — community listing, Trust Score tracking, and basic analytics included.

No annual contract — monthly billing, cancel anytime, upgrade in two taps.

Plans grow with the business — from first listing to multi-location at community scale.

Zara and Marcus. They made each other possible.

1

Member joins

Zara downloads the app, sets her preferences, discovers Copper & Oak, visits, reviews, and saves. She earns points and starts a Kinfolk Circle.

2

Business grows

Marcus gains a 5-star review, sees the chip analytics, upgrades to Growth, activates a promotion, and watches his Trust Score rise.

3

Platform deepens

More members mean more reviews, more safety data, more community intelligence, better KinfolkAI context, and more businesses worth listing.

4

Community strengthens

Businesses invest in their community presence. Members invest in the platform. The Trust Score becomes more valuable. The loop compounds.

Every feature exists to spin this flywheel.

Safety tools bring members. Members bring reviews. Reviews build Trust Scores. Trust Scores bring more members and better businesses. Better businesses bring more members. The community is the product — and it builds itself.

Every feature feeds the loop.

No feature in Mapping With Melanin is decorative. Each one is a point on the flywheel — bringing members in, keeping them engaged, building Trust Scores that make businesses worth finding, and making the community worth belonging to.

- **Safety Hub** — Members come for safety. They stay for community.
- **Trust Score** — Community action becomes business signal.
- **KinfolkAI** — AI surfaces the right businesses at the right moment.
- **Kinfolk Circles** — Crews plan together. Businesses benefit.
- **Reviews + Chips** — Structured community voice builds platform intelligence.
- **Events + Library** — Deeper engagement extends time-in-community.

We're building the infrastructure for diaspora discovery.

Not a directory. Not a rating app. Not a social network. A full-stack platform where safety, community, commerce, and intelligence converge — built specifically for melanated and minority communities who have always moved through this world with both joy and vigilance.

**Zara found her people. Marcus grew his business.
That's not a product feature. That's a community.**

Find your people. Anywhere.

From the first app open to the first brunch reservation, the first safety alert to the first Kinfolk Circle, the first business saved to the first Trust Score that earns it — we built a world where the diaspora moves with confidence, connection, and community.

ZARA'S PROFILE

Her identity in the community.

Zara's profile is her community passport — her saved places, reviews, circles, points, and life journeys all in one view. Visitors can see her activity. She controls what's public.

- 47 saved places across 8 cities
- 12 reviews written trusted community voice
- 450 pts Navigator membership

ZARA'S REVIEWS TAB

Her voice on the record.

Every review Zara writes is tied to her profile and her Trust Score contribution. Businesses see her as a known, verified community voice — not an anonymous stranger.

MARCUS'S PROFILE

Owner presence. Community trust.

Marcus's profile isn't separate from his business — it's connected to it. Community members can see the person behind the Trust Score 97 and follow his business updates.

The index only works if it **stays honest.**

Any member can report a business that doesn't belong — whether it's not minority-owned, has incorrect information, or has permanently closed. The community reviews it. The platform acts.

Not minority-owned

The most critical flag — preserves directory integrity.

Permanently closed

Community keeps the map current without a staff team.

False information

Wrong hours, address, or ownership details.

Misleading photos

Bait-and-switch visuals that misrepresent the experience.

| *Every report is anonymous by default. Three community confirmations trigger a formal review.*

STEP 1 OF 3

Flag it. Tap Report.

On any business profile, the "... " menu includes a Report option. Zara spots a business that doesn't belong in the directory — it's not minority-owned. She taps Report.

STEP 2 OF 3

Select the reason.

Six structured report categories keep the community process fair and actionable. "Not minority-owned" is the most critical flag — it's selected here. Zara adds her reason with one tap.

9:41 AM

< Report Business

Urban Eats Kitchen
Why are you reporting this business?

- ☒ **Not minority-owned**
Business doesn't qualify for our directory
- ☐ **Incorrect information**
Wrong hours, address, or ownership
- ☐ **Business is closed**
Permanently shut down
- ☐ **Misleading photos**
Images don't represent the real experience
- ☐ **Abusive owner response**
Response violates community guidelines
- ☐ **Other**
Something else not listed here

Continue →

STEP 3 OF 3

Add context. Stay anonymous.

Optional evidence helps our community team verify the report faster — but it's never required. Anonymous mode is on by default. Zara submits with zero fear of retaliation.

9:41 AM

< Add Details

Not minority-owned

Additional context (optional)

Ownership is listed under a different LLC on public business registrations. The original owner sold in 2024.

Submit anonymously ☒

Business never sees your name

What happens next

- Your report enters the community review queue
- 3 confirmations → formal platform review
- Confirmed flags add a visible indicator to the listing

Submit Report

REPORT SUBMITTED

Zara did her part. The index stays clean.

One member report. Zero friction. The report enters the community review queue. When three members confirm it, a "Community Review" badge appears on the business. The platform investigates.

This is how the index self-corrects without a full-time moderation team.

Real-time accountability from **real people.**

When community members spot law enforcement activity, they submit real-time Officer Watch alerts. Type, location, confirmation count — surfaced to everyone nearby in seconds. No scanner app. No police blotter. Community-sourced and community-confirmed.

Checkpoint

Vehicle stops with ID checks — reported by type and location.

Traffic Stop

Pull-overs in progress — includes intersection and direction.

Foot Patrol

Officers on foot in a specific area — good to know before you walk.

Stop & Question

Individual stops without clear cause — the most critical to document.

| *All alerts are anonymous by default. Community confirmations make them more reliable — not police validation.*

OFFICER WATCH MAP

3 active alerts. Shaw right now.

Zara opens Officer Watch before walking from the Metro. She sees a checkpoint on Georgia Ave, a foot patrol on U Street, and a traffic stop on 14th. She plans her route accordingly.

SUBMIT AN ALERT

Zara sees a checkpoint. She reports it.

Six activity types. Auto-detected location. Optional badge number. Anonymous toggle on by default. Takes under 30 seconds — and immediately protects everyone nearby.

9:41 AM

< Submit Officer Alert

ALERT LIVE

Submitted. Community confirming.

Zara's checkpoint alert went live in seconds. 14 community members confirmed it. Four shared route alternatives. The community protected each other — without a single app notification from Zara.

This is what safety looks like when the community owns it.

Felt unsafe at a business? Report it.

If a community member experiences racial profiling, discrimination, or harassment at any business — minority-owned or not — they can file an Unsafe Space report. It's confidential, structured, and community-reviewed.

- Separate from business reviews — this is an incident report, not a rating
- 3 community confirmations → 'Community Caution' badge on the business
- Owner may be notified or not — reporter chooses

9:41 AM

< Report Unsafe Space

Urban Eats Kitchen
Columbia Heights · Restaurant 71

When did this happen?

Today, July 11 — approx. 9:15 AM

What happened?

☒ Racial profiling

☐ Unwelcoming / hostile staff

☐ Followed in store

☐ Denied service

☐ Overcharged / price discrimination

☐ Other harassment

Notify business owner
Owner sees incident type, not your identity

File Unsafe Space Report

INCIDENT FILED

She was heard. The community acts.

The Unsafe Space report is filed, anonymized, and enters the community review queue. When two more members confirm a similar experience, a "Community Caution" badge appears publicly on Urban Eats Kitchen's profile — visible to all users before they visit.

No other platform puts this protection in the same app as the business directory.

Your big moves, mapped.

Whether you're relocating to a new city, starting a business, going through a health journey, or rebuilding after a loss — Life Journeys connect your personal milestones to community resources and minority-owned businesses that have walked the same road.

Relocating

Zara is moving to DC — her journey connects movers, neighborhoods, and early community.

Health & Wellness

Navigate culturally competent providers, wellness spaces, and support networks.

Starting a Business

Find vendors, legal support, and banking through community-vetted businesses.

Major Life Events

New parent, graduate, caregiver — any milestone can become a mapped journey.

| *KinfolkAI injects your active journey into every conversation — so advice is always in context.*

ZARA'S JOURNEY

Moving to DC. Not alone.

Zara created a "Moving to DC" Life Journey when she decided to relocate. The platform mapped her progress through 5 stages and connected her to community-vetted businesses at each step — movers, markets, restaurants, and wellness spots.

Started June 2026 Journey creation date

Stage 4 of 5 Currently in Settle In

8 businesses connected To stages across the journey

Tag it. Find it again.

1 Trending hashtags strip

Real-time trending tags float above the feed — tappable, filterable, and color-coded by your followed topics. The community sets what's trending. Not an algorithm.

3 Inline hashtag navigation

Every #tag in a post body is a live link — tap it to enter a dedicated hashtag feed filtered to that tag, with a follow/unfollow toggle at the top.

2 Location-tagged posts

Every post can carry a venue name, city, and GPS pin sourced from the community places directory. Safe Spaces entries grow automatically from location-tagged activity.

4 Follow tags, not accounts

Follow #SundayBrunch, #ShawEats, or #BlackWallStreet and let those tags curate your Following feed — without needing to find and follow individual users first.

Hashtags.

Tap a tag. Enter the conversation.

Trending tags live above the feed. Every #hashtag in a post is a live portal. Location pins create community-verified Safe Spaces entries automatically with every tagged post.

The community writes the index.

- **Trending strip** — 12 live hashtags above the feed, color-coded by your followed tags.
- **Tappable #tags** — every tag in a post opens a dedicated filtered feed with a follow toggle.
- **Location pin** — every tagged post auto-creates or increments a Safe Spaces entry.

Know before you go.

1

Community-sourced, not Google-imported

Every entry is added or confirmed by a real community member with location data, a safety note, and tags. Not pulled from a generic business directory.

3

Search by venue, city, or vibe

Filter by neighborhood, country, or tag. Find a coworking space in Accra, a salon in Shaw, or a hotel in Kingston that the diaspora has stamped as safe and welcoming.

2

Grows automatically from posts

When a member tags a location on a community post, that venue is automatically added to the Safe Spaces directory with a post count — discovery happens passively.

4

Linked to the community feed

Each Safe Space has its own feed of posts tagged to it. Tap a place and read what the community has experienced there — in their own words.

Safe.

The diaspora marks what's welcoming.

Browse community-verified spots across cities and countries. Filter by neighborhood, language, or vibe. Each entry grows richer with every post tagged to it — no editorial team required.

Safety is a shared language.

— **340 places** globally — restaurants, salons, hotels, coworking spaces, and cultural venues.

— **Grows passively** — every location-tagged community post adds to or increments a place entry.

— **Diaspora reach** — DC, NYC, Atlanta, London, Kingston, Lagos, Accra and growing.

Show up. Be seen.

1

Score 0–100 based on real activity

Reviews written, businesses supported, events attended, posts made, and referrals given — all weighted into a single Community Impact score visible on every profile.

3

Business owners linked to their profile

Verified business owners show their listings on their community profile — and the community can see which businesses they champion, not just which ones they own.

2

Three tiers: Supporter, Builder, Champion

At 25 points you're a Supporter. At 50 a Builder. At 80 a Champion. The badges communicate trust and presence without creating a leaderboard or competitive hierarchy.

4

Trust flows both ways

A business owner with a high Community Impact score carries credibility into their business listing. The community funds the trust metric — not advertising spend.

Impact.

Your community presence, scored and surfaced.

Every member profile carries a Community Impact card — reviews, events, posts, and referrals scored 0–100. Business owners show their verified listings alongside their community activity. Trust runs in both directions.

Presence earns trust. Trust earns reach.

— **Score 72/100** — Builder tier. Earned through reviews, events, posts, and referrals.

— **Businesses championed** — shows the places Zara reviewed and supported, linked and tappable.

— **Bidirectional trust** — business owners link their listing to their profile; impact score flows into business trust.

Work within the community.

1

Jobs board with Near Me radius filter

Post or browse open roles filtered by distance, pay range, job type, and remote availability. Haversine-distance sorting puts the closest opportunities first — not sponsored listings.

3

Post a job in 3 steps

Business owners and community organizers can list open roles with pay range, category, and remote/in-person flag — visible immediately to nearby members. No resume upload wall.

2

Mentorship profiles — find your guide

Mentors set their specialty (finance, tech, creative, legal), preferred session type (video, in-person, async), and book via Calendly links embedded directly in their profile card.

4

Register as a mentor in 3 steps

Complete the mentor profile with specialties, background, and availability — and go live for the community within minutes. No application review delays.

Opportunity.

Jobs and mentorship, inside the community.

Browse open roles ranked by distance.
Find a mentor in finance, tech, or creative
fields. Post a job or register as a mentor
in 3 steps. No gatekeepers — just the
community helping each other grow.

*The next opportunity is already in
your community.*

— **Near Me sorting** —
Haversine distance
ranks local jobs first. No
promoted listings.

— **3-step job post** —
business owners
publish roles
immediately with pay
range, type, and
location.

— **Mentor booking** —
Calendly link embedded

for instant scheduling.

Three tools for community wealth.

Community Marketplace

- Buy, sell, or trade within the community. 6 categories: goods, services, housing, rideshare, tutoring, events. No external payment processor required — contact happens inside the platform.
- Listings include photos, price, condition, and location. Members filter by category and distance.

Wellness Tracker

- Log daily wellness check-ins with mood and notes. Set personal goals with target dates and categories — physical, mental, spiritual, social. Streak tracking shows consistency over time.
- Private by default. Never shared, never sold. A quiet space to show up for yourself.

Financial Hub

- Set financial goals (emergency fund, homeownership, debt freedom) with target amounts and dates. Track progress with check-ins. Access 10 curated resources: credit, investing, generational wealth.
- Built for communities historically excluded from mainstream financial literacy tooling.

Resources.

Marketplace. Wellness. Wealth.

Three independent tools in the Resources tab: a community marketplace for buying and trading within the diaspora; a private wellness tracker with streak-based accountability; and a financial hub for goal-setting and curated wealth resources.

Everything you need to thrive, in one tab.

- **Marketplace** — buy, sell, trade within the diaspora. 6 categories, 47+ live listings.
- **Wellness streak** — 12-day streak shown at a glance. Private check-ins with mood and notes.
- **Financial goals** — progress bars, target amounts, and 10 curated wealth resources.

Safe for every household.

1 4-tier audience ratings on all content

Every post, event, and library article carries an audience rating — Everyone, Teen, Young Adult, or Adult — set by the author and enforced platform-wide for consistency across content types.

3 Family settings for granular control

Members can set separate guidance thresholds for posts, events, and library content — allowing a Young Adult content level for articles while keeping Everyone-only for the community feed.

2 Family Mode — one toggle, full coverage

Parents activate Family Mode in settings to filter all feed, event, and article content to Everyone-rated only. The filter applies across every tab instantly without per-item management.

4 Badge-first visibility

Audience rating badges render on every piece of content before it's opened — so members see the rating in the card, not after tapping in. No surprises. No retroactive consent.

Guidance.

One platform. Every generation.

Audience ratings appear on every post, event, and article before the member opens it. Family Mode applies a single Everyone-only filter across all tabs instantly. Parents stay in control without managing each piece of content individually.

Bring the whole family in.

- **Family Mode ON** — one toggle filters the entire app to Everyone-only content across all tabs.
- **Custom thresholds** — set different rating limits for posts, events, and articles independently.
- **Badge-first display** — audience rating visible on every content card before the member opens it.

Share with intention.

1 Link previews — rich cards, not raw URLs

When a member pastes a URL into a post, the platform fetches the title, description, domain, and favicon automatically. Posts render a clean, branded link card — not a bare link nobody clicks.

3 Post visibility — Public, Followers, or Private

Every post carries a visibility selector: Public (index-visible), Followers Only (following feed only), or Private (saved to profile only). Authors control their reach at composition time.

2 Reposts with context

Members can repost any community post to their feed, with an optional personal caption added above the original. The original author's attribution is always preserved in the repost card.

4 Status Composer and Saved Spots sharing

Quick status posts with text and emoji-free icons. Members can share curated saved place lists with the community — with a health-keyword double-confirm before any private save goes public.

Social.

Every share is a conscious choice.

Link previews render automatically. Reposts carry attributed context. Visibility — Public, Followers, or Private — is chosen at composition time. Saved Spots can be shared selectively, with a confirmation gate for sensitive content.

Not going viral. Going deep.

— **Link preview cards** — title, domain, and favicon auto-fetched and rendered as clean card previews.

— **Attributed reposts** — original author always preserved; add your own caption above the source post.

— **Visibility at compose time** — Public, Followers Only, or Private chosen before the post goes out.

Celebrate the people making a difference.

1 Recognition over popularity

Show Love isn't a vote count. It shows 'Recommended by 47 community members' — not 4,327 votes. The emphasis is on trust and authentic impact, not viral metrics.

3 Why People Show Love — signature section

Every profile has a 'Why People Show Love' section surfacing short, authentic testimonials. 'She introduced me to my favorite bookstore.' These stories carry weight that numbers never will.

2 4 forms of appreciation

Members express recognition in four specific ways: Show Love (heartfelt connection), I Support (aligning values), Saved (want to visit/engage), and Visited (personal experience confirmed).

4 Linked to Community Impact

Consistent, genuine Show Love nominations increase the nominee's Community Impact score — connecting recognition directly to the platform's trust architecture without pay-to-play shortcuts.

Show Love.

Recognition that means more than a number.

Nominate creators, businesses, mentors, artists, and community leaders in 3 steps. Four forms of community appreciation — Show Love, I Support, Saved, Visited. Every profile earns a "Why People Show Love" section built from real stories, not star ratings.

The community writes the testimonials.

— **3-step nomination** —
Who, what category, and why. Simple enough to do in under 2 minutes.

— **No popularity contest** —
Shows 'Recommended by 47 community members,' not a raw vote count.

— **Stories over stats** —
'Why People Show Love' section surfaces testimonials on every profile.

Designed to Give Back. Priced to Stay Accessible.

Safety is always free. AI travel planning, family seats, and advanced tools are unlocked by tier — shared as a pool so families benefit together without multiplying costs.

 **Pooled AI, not per-person**
The family shares one monthly AI budget — upgrading the plan increases the pool.

 **Search is never gated**
Minority-owned business discovery stays open to every member and visitor.

 FAMILY PLAN MANAGEMENT

One plan. Your whole family.

Add a family member from \$2.99/mo. They share your AI pool, access safety features, and plan trips together — without paying for a separate subscription.

-  **Live AI pool meter**
See exactly how many KinfolkAI requests remain this month across your family.
-  **Invite in seconds**
Enter an email. They accept. Done — they're in your family circle instantly.
-  **Safety always on**
Officer Watch and neighborhood scores work for every member at every tier.

CHAPTER FOUR

The Community Chapter

Welcome home.

MAPPING WITH MELANIN™

A BELONGING PLATFORM

Welcome Home.

Home isn't always where you were born.
Sometimes it's where you finally feel understood.

MAPPINGWITHMELANIN.COM

**Most maps tell you how
to get somewhere.**

**We help you
understand what it
feels like when you get
there.**

THE PLATFORM

One platform. Every part of belonging.

Mapping With Melanin™ brings together the people, businesses, cultural heritage, community safety, and trusted recommendations that help someone feel connected — whether they're exploring a new city or deepening roots where they already live.

EVERY JOURNEY COUNTS

This isn't only for vacations.

- Finding a new favorite coffee shop.
- Supporting a local entrepreneur.
- Moving to a new city.
- Visiting family.
- Attending college.
- Taking a business trip.
- Exploring your own hometown.
- Building a life.

They're all expressions of one idea: helping people feel like they belong wherever life takes them.

WHAT MAKES IT DIFFERENT

We changed the language. Because we changed the category.

SAY

- Before You Even Arrive**
Leave uncertainty at home before you ever pack a bag
- The Confidence Layer**
We don't replace your judgment. We strengthen it.
- See a City Through Your Community**
Map the feeling, not just the route
- Walk Through Living History**
Stories, movements, and moments that continue to inspire
- Find Your People**
Community isn't something you stumble into. It's something you build.
- Meet Kinfolk**
Most AI tells you what exists. Kinfolk helps you understand what belongs.

Before You Even Arrive.

Leave uncertainty at home. Kinfolk helps you prepare before you ever pack a bag. Ask questions naturally, discover neighborhoods, understand the local culture, and build confidence before you arrive.

- Neighborhood deep-dives
- Cultural context
- Local recommendations
- Safety insights
- Community connections

MEET KINFOLK

Kinfolk.

*"Most AI tells you what exists.
Kinfolk helps you understand what belongs."*

Kinfolk isn't built to answer questions.
It's built to understand context. It learns what matters to you, considers where you're going, and helps you discover experiences that reflect your interests, your community, and your journey.

Understands Context, not just keywords — who you are shapes every answer

Learns From your community's lived experiences, not generic data

Prepares You before you arrive, so you travel with confidence

Connects You to the right people, places, and moments

Belongs To your community — it grows smarter with every member

COMMUNITY SAFETY INTELLIGENCE

Know Before You Go.

Safety isn't just crime statistics.
It's lived experience.

Mapping With Melanin™ overlays community insights directly onto the map so every decision is informed by people who have actually been there. We don't replace your judgment. We strengthen it.

- **The Confidence Layer** Real-time safety scores from community members who live there
- **Officer Watch** Community reports on law enforcement encounters
- **Move Alerts** Neighborhood change notifications from your network
- **Buzz Alerts** Positive community activity signals for local areas

THE MAP

See a City Through Your Community.

Not just Google Maps. Three layers of community intelligence rendered simultaneously — so every neighborhood tells you its full story before you arrive.

01 Community Business Pins

11 category-specific icons surfacing minority-owned businesses by type

02 The Confidence Layer

Safety heatmap built from community surveys — not government crime data

03 Cultural Heritage Sites

Landmarks, movements, and neighborhoods that shaped the culture

Walk Through Living History.

Discover the places that shaped culture — not just landmarks, but stories, neighborhoods, movements, and moments that continue to inspire communities today.

On the map

Heritage pins integrated directly into community discovery

Deep context

Historical narrative, photos, and community notes per site

Living layer

Tap any site to understand the culture before you visit

BUSINESS DISCOVERY

Businesses Have **Stories.**

Every business has a reason it exists.

Hear directly from owners, learn what inspired them, and discover the people behind the storefront.

- **Owner Story** — The reason it exists, in their own words
- **Community Confidence Score** — 0–100 rating from people who have actually been there
- **Compliment Chips** — Specific praise from community members
- **Featured Video** — See the business come alive before you visit
- **Verification Badge** — Confirmed minority-owned and community-verified

COMMUNITY

Find Your People.

Community isn't something you stumble into.
It's something you build.

Discover people who share your interests, your experiences, and your values — whether you're traveling across the country or across town.

- **Kinfolk Circles** — Private group travel planning with shared saves and collective AI curation
- **Community Feed** — Posts, stories, and recommendations from your extended network
- **Safe Spaces** — Curated directory of verified welcoming and inclusive locations
- **Events** — Local gatherings, activations, and meetups from your community

Welcome Home.

Home isn't always where you were born.
Sometimes it's where you finally feel understood.
That's what we're building.
