

MWM Database Seeding — Second Extraction Pass

Status: EXECUTE IMMEDIATELY (Build 103)

Context

The first seed pass inserted 438 entities from the three Manus tour guide documents. This was a quality-first pass that averaged 8–12 entities per city. The guides contain 15–20+ named entities per city, totaling approximately 1,317+ distinct named entities. **879 entities remain unseeded.**

Nothing was lost — the three guide documents are the source of truth. This instruction authorizes and requires a second extraction pass to close the gap.

Directive

Go back through **all three guide documents** (Parts 1, 2, and 3) and extract **EVERY remaining named entity** that was not included in the first pass. The target is **1,317+ total entities** in the database.

What to Extract (if it has a name and a city, it gets a pin):

- **Every restaurant** — soul food, Ethiopian, Caribbean, Vietnamese, Korean, Mexican, Brazilian, West African, fusion, etc.
- **Every salon, barbershop, and beauty business**
- **Every wellness center, gym, yoga studio, spa**
- **Every bookstore, gallery, art studio**
- **Every market** — farmers markets, flea markets, cultural markets, grocery stores, specialty food stores
- **Every community organization, nonprofit, cultural center**
- **Every church, mosque, temple** mentioned by name
- **Every bar, lounge, nightlife venue, music venue**
- **Every retail shop, boutique, clothing store**
- **Every professional service** mentioned by name (if any)

- **Every park, garden, outdoor space** mentioned by name
- **Every mural, sculpture, or public art** mentioned by name or location

Rule: If the guide names it, it gets a pin. No exceptions. No "quality threshold." Every named entity matters.

Additional Data to Seed (Beyond Pins)

1. City Descriptions → `city_profiles` Table

Each city section in the guides begins with a **Historical Context** paragraph (1–3 paragraphs explaining the city's cultural significance). These should populate the `city_profiles` table:

- `historical_context` — The full historical context paragraph(s) from the guide
- `brief_context` — A 2–3 sentence summary extracted from the historical context
- `why_mwm_here` — The "Why MWM Should Be Here" or strategic significance text (if present in the guide)

Every city in the guides should have a `city_profiles` entry. If one already exists, update it with the richer content from the guide (our descriptions are more detailed than generic ones).

2. Visit Tips → `visit_tip` Field

The first pass may not have included visit tips on all entities. For the second pass:

- **Churches:** "Sunday mornings are when this community comes alive — arrive early and you'll feel the spirit before the service starts."
- **Barbershops:** "Saturday mornings are community gathering time — the conversations are as good as the cuts."
- **Coffee shops near HBCUs:** "Best visited weekday mornings 8–10am when students and creatives gather before class."
- **Farmers markets:** "Saturday mornings are the heartbeat — get there by 9am before the best produce is gone."
- **Soul food restaurants:** "The lunch rush (11:30am–1pm) is when you see the real community. Come at 2pm if you want to talk to the owner."
- **Historic districts:** "Walk it in the morning when the light hits the murals just right."
- **Nightlife venues:** "The energy picks up after 9pm — weekends are when the community shows out."

- **Ethiopian restaurants:** "The coffee ceremony is the experience — don't rush it."
- **Vietnamese restaurants:** "Phở is a morning tradition — the early crowd knows the broth is freshest."
- **Caribbean spots:** "Friday evenings bring the island energy — live music, rum punch, and community."

Every entity that is a gathering place, cultural experience, or community institution should have a `visit_tip`. Professional services and retail shops can skip this field.

3. Content Opportunity Notes → `content_note` Field (Admin-Only)

The guides include notes like "Great for Living Legacy content" or "Interview the owner about..." These should be stored in an admin-only field called `content_note` that the founder can see when planning tour visits. Not visible to users.

4. Helpful Hints from the Guides

Any practical tips from the guides (parking, accessibility, seasonal hours, neighborhood safety notes) should be appended to the entity's `description` field or stored in a `practical_tips` field.

Technical Requirements

Upsert Logic (Already Built)

The existing script's upsert logic handles duplicates safely:

- If an entity with the same `name + city` already exists → **enrich** it (update description, add `visit_tip`, add `content_note`)
- If it's new → **insert** it
- Never create duplicates

Listing Status Rules (Same as First Pass)

- Philadelphia entities → `live_unclaimed`
- All other cities → `staged`

Data Source Tag

- All second-pass entities: `data_source: "manus_tour_guide_pass_2"`
 - This distinguishes them from first-pass entities (`manus_tour_guide`) for tracking
-

Verification Report

After the second pass, provide:

Metric	Count
Total entities in database (after both passes)	Target: 1,317+
New entities inserted (second pass)	~879
Existing entities enriched (second pass)	Variable
Errors	0 (target)
Cities with city_profiles entries	All 53+
Entities with visit_tips	60%+ of gathering places
Entities with content_notes	Where guides provided them

Per-City Spot Check

Provide entity counts for these 5 cities to verify completeness:

1. Philadelphia, PA — should have 15–20+ entities
2. Atlanta, GA — should have 15–20+ entities
3. New Orleans, LA — should have 15–20+ entities
4. Houston, TX — should have 15–20+ entities
5. New York, NY — should have 15–20+ entities

Sample Entities

Show 3 examples of second-pass entities with all fields populated (including visit_tip and content_note).

Non-Negotiable Rules

1. **If the guide names it, it gets a pin.** No editorial filtering. No "quality threshold." The founder curated these guides — every entity was chosen intentionally.
2. **City descriptions go into city_profiles.** Every city gets a Living Legacy story.

3. **Visit tips use Kinfolk voice.** Warm, culturally authentic, like advice from a friend. Never generic tourism language. Never Yelp-speak.
 4. **Nothing is deleted.** First-pass entities are enriched, not replaced.
 5. **The three guide PDFs are the source of truth.** If there's a conflict between the guide and any other data source, the guide wins.
-

Timeline

This should be completed as part of Build 103. The founder needs all pins live before the tour starts August 15. Every day of delay is a day the map feels emptier than it should.
